

HONG KONG SECURITY ANALYSIS REPORT

AI-Assisted Open Source Intelligence Assessment

Analysis Period: October 31, 2026 - November 07, 2026

This report was produced using open-source intelligence analysis. The assessment is grounded in publicly available reporting and should be cross-referenced with primary sources. RSS feed articles are listed in the annex for reference.

Executive Summary

During the period of October 31 to November 07, 2026, Hong Kong's security landscape was primarily shaped by intensified national security enforcement, significant cybersecurity developments, and continued diplomatic friction with Western powers. The sentencing of prominent democracy activist Joshua Wong to an additional 10 years in prison under the National Security Law drew strong condemnation from a coalition of ten countries, including the "Five Eyes" allies, which Hong Kong and Beijing swiftly rejected as interference. Concurrently, Hong Kong successfully concluded a large-scale cybersecurity drill involving both government and private sectors, even as a major local airline, Cathay Pacific, reported a data breach as part of a wider "Black October" global cyberattack wave. The city also announced the expansion of its "SmartView" surveillance network with AI facial recognition capabilities, further solidifying its internal security posture through technological means. These developments underscore a deepening divergence between Hong Kong's internal governance under Beijing's influence and international expectations regarding human rights and autonomy, while also highlighting evolving threats in the digital domain and their economic implications.

Key Security Developments

- Cybersecurity Attack and Defence Drill 2026 Concludes

The Hong Kong Cybersecurity Attack and Defence Drill 2026, spearheaded by the Digital Policy Office (DPO), successfully concluded on October 31, 2026. This three-day exercise, which commenced on October 29, involved 51 defending "Blue Teams" from 28 government departments, 23 public organizations, and private enterprises, alongside 23 attacking "Red Teams" from Hong Kong and Mainland cybersecurity professional organizations and tertiary institutions. The drill aimed to identify system vulnerabilities and enhance the defense mechanisms and incident response capabilities across critical infrastructure, demonstrating strengthened collaboration between Guangdong and Hong Kong in cybersecurity.

- Cathay Pacific Suffers Cybersecurity Breach

Around October 30, 2026, Hong Kong's flag carrier, Cathay Pacific, disclosed a cybersecurity breach at an external supplier that compromised approximately 53,000 flight booking records. This incident was part of a broader "Black October" wave of severe cyberattacks that struck global institutions, leading to significant financial

losses in the cryptocurrency sector and exposing private personal information worldwide. The breach underscores the persistent and evolving nature of cyber threats impacting even major corporate entities in Hong Kong.

• Joshua Wong Sentenced to 10 Years Under National Security Law

On November 5, 2026, the Hong Kong High Court sentenced prominent democracy activist Joshua Wong to an additional 10 years in prison for "conspiring to collude with foreign forces" under the National Security Law. Wong, who pleaded guilty in September, was accused of urging foreign governments to sanction Hong Kong and Chinese officials between 2016 and November 2020. This sentencing adds to his existing prison term and is seen as a significant escalation in the ongoing crackdown on dissent in the city.

• International Condemnation of National Security Law Enforcement

Following Joshua Wong's sentencing, foreign ministers from ten countries, including the "Five Eyes" allies (Australia, Canada, New Zealand, the United Kingdom, and the United States), France, Germany, Italy, Japan, and the Netherlands, issued a joint statement on November 6, 2026. They called for an immediate end to "unjust prosecutions" under Hong Kong's national security law, citing Wong's case as a further example of targeting individuals for political expression. This collective diplomatic pressure highlights persistent international concerns over human rights and freedoms in Hong Kong.

• Hong Kong and Beijing Reject Foreign Interference

The Hong Kong government strongly condemned and rejected the joint statement from the ten countries on November 6, 2026, urging foreign forces to cease their "baseless malicious attacks" and interference in Hong Kong's internal affairs. China's Foreign Ministry spokesperson, Guo Jiakun, also reiterated Beijing's firm support for Hong Kong in safeguarding national security and punishing lawbreakers, emphasizing that Hong Kong upholds the rule of law. This firm stance underscores the continued diplomatic rift between China and Western nations over Hong Kong's autonomy.

• Expansion of AI Facial Recognition Surveillance

Starting in November 2026, Hong Kong police are deploying artificial intelligence (AI) powered facial recognition technology across their expanding "SmartView" surveillance camera network. This initiative aims to improve the efficiency of searching for missing people and tracking down suspects, with video data stored for up to 31 days and facial recognition data for up to 180 days. The SmartView project, initiated in 2024, plans to install 60,000 cameras city-wide by 2028 and has already assisted in solving nearly 2,200 criminal cases. Reports from October 2026 also indicated talks to link private mall CCTV to the police's SmartView network.

• Push for National Security Education in Schools

October 2026 was marked by a significant push for national security education in early childhood and primary schools across Hong Kong. This included the launch of "NSmarties," a generative-AI platform enabling primary pupils to create national security storybooks and quizzes, voiced by senior security officials. Additionally, 16 "national security tutors" were appointed by Po Leung Kuk, and a new Security Bureau picture-book series is set to reach over 900 kindergartens and public libraries by year-end.

- Triad Crackdown Amidst Rising Youth Crime

On October 31, 2026, Hong Kong police conducted a triad crackdown, resulting in 58 arrests. This operation was carried out amidst a reported spike in youth crimes, indicating ongoing efforts by law enforcement to address organized crime and maintain public order.

- HKT to Cease US Services Due to National Security Concerns

A Reuters report on October 31, 2026, indicated that HKT, one of Hong Kong's largest telecom companies, has agreed to cease its international and domestic services to and within the United States by September 1, 2027. This decision is part of the US administration's telecom crackdown on China, citing national security concerns and HKT's affiliation with China Unicom. This move highlights the increasing impact of geopolitical tensions on commercial operations between Hong Kong/China and the US.

- Geopolitical Uncertainties Impact Hong Kong's Economy

Financial Secretary Paul Chan warned on October 31, 2026, that geopolitical uncertainties, particularly the conflict in the Middle East, are contributing to elevated international oil prices and potentially higher interest rates. These factors are expected to weigh on Hong Kong's property market and the broader economy in the coming year, necessitating a prudent approach to financial risks. The Hang Seng Index also saw a 1.27% decline in the week ending November 7, 2026, partly attributed to geopolitical tensions.

Geopolitical Impact and Regional Dynamics

The recent security developments in Hong Kong continue to underscore the city's increasingly integrated status within mainland China's national security framework, significantly impacting its geopolitical standing and relations with major global powers. The sentencing of Joshua Wong and the subsequent joint statement from ten Western nations on November 6, 2026, exemplify the persistent tension between Beijing's assertion of sovereignty and international calls for the preservation of Hong Kong's autonomy and human rights. This diplomatic confrontation reinforces the perception among Western allies, including the US, UK, EU, and Japan, that China is in

"ongoing non-compliance" with the Sino-British Joint Declaration, leading to continued criticism and potential for further targeted sanctions or diplomatic actions. Hong Kong and Beijing's firm rejection of these criticisms as "baseless malicious attacks" and interference in internal affairs signals a hardening of positions, making diplomatic resolution challenging.

The US administration's telecom crackdown, leading to HKT's agreement to cease services in the US by September 2027, illustrates a broader trend of technological and economic decoupling driven by national security concerns. This move reflects a deepening distrust in critical infrastructure sectors and could prompt other nations to review their technological dependencies on Chinese-affiliated companies, further fragmenting the global digital landscape. While Hong Kong seeks to maintain its role as an international financial and maritime hub, as evidenced by the upcoming Maritime Week 2026, these geopolitical pressures and the convergence of its legal and intelligence environment with mainland China pose challenges to its "super connector" status.

Regionally, Hong Kong's cybersecurity collaboration with Mainland organizations in the recent drill highlights a strategic alignment within the Greater Bay Area, aiming to bolster collective digital resilience. However, the simultaneous occurrence of the Cathay Pacific data breach amidst a global "Black October" cyberattack wave demonstrates that Hong Kong remains vulnerable to transnational cyber threats, irrespective of its internal security measures. The economic warnings from Financial Secretary Paul Chan regarding geopolitical uncertainties and the Middle East conflict underscore how global instability directly impacts Hong Kong's economic outlook, linking its financial health to broader international dynamics, including oil prices and interest rates. This complex interplay of internal security consolidation, external diplomatic pressure, and global economic volatility defines Hong Kong's current geopolitical position.

Military and Defense Analysis

During the reporting period, there were no direct reports of significant military activities, defense acquisitions, or major shifts in defense policy specifically concerning Hong Kong's garrison by the People's Liberation Army (PLA). The focus of security developments within Hong Kong itself remains firmly on internal security, law enforcement capabilities, and critical infrastructure protection, rather than conventional military defense.

The primary area of development in Hong Kong's defense posture, broadly defined, is the enhancement of its internal security and surveillance capabilities through technological modernization. The deployment of AI facial recognition technology

across the expanding "SmartView" surveillance camera network, commencing in November 2026, represents a significant upgrade in the Hong Kong Police Force's ability to monitor public spaces, track individuals, and aid in criminal investigations, including those related to national security. This initiative, which aims for 60,000 cameras by 2028, signifies a strategic shift towards a more technologically advanced and pervasive surveillance apparatus, aligning with mainland China's approach to social governance.

Furthermore, the successful conclusion of the Hong Kong Cybersecurity Attack and Defence Drill 2026 on October 31, 2026, involving extensive collaboration between government departments, public organizations, and private enterprises, as well as "Red Teams" from both Hong Kong and mainland China, highlights a concerted effort to bolster cyber resilience. While not a traditional military exercise, this drill is crucial for national security in the digital age, protecting critical infrastructure from cyberattacks. Previous counter-terrorism exercises at key locations like the Huanggang border crossing (August 2026) and AsiaWorld-Expo (September 2026), along with a counter-terrorism exhibition (October 2026), indicate an ongoing commitment to enhancing preparedness and response capabilities against hybrid threats, including cyber and physical terrorism. These efforts, coordinated by the Hong Kong Police Force and Security Bureau, demonstrate a focus on a multi-agency approach to internal security, with an emphasis on prevention, preparedness, response, and recovery.

Outlook and Forecast

Short-term trends (1-3 months):

In the immediate future, Hong Kong is expected to continue its stringent enforcement of national security legislation, likely leading to further arrests and prosecutions of individuals perceived as challenging Beijing's authority. The recent sentencing of Joshua Wong will likely serve as a precedent, reinforcing the government's resolve to apply the National Security Law broadly. We anticipate an accelerated rollout and integration of advanced surveillance technologies, particularly the AI-powered "SmartView" network, which will enhance the police's monitoring capabilities across the city. Diplomatically, Hong Kong and Beijing will maintain their firm stance against international criticism regarding human rights and national security, likely leading to continued diplomatic friction with Western nations. Economically, Hong Kong will remain susceptible to global geopolitical uncertainties, with Financial Secretary Paul Chan's warnings about elevated oil prices and interest rates likely to materialize, potentially impacting the property market and overall economic growth. Cybersecurity will remain a critical focus, with ongoing efforts to strengthen defenses following recent breaches, alongside increased cross-border collaboration with mainland China

in this domain.

Critical flashpoints and risk areas:

A critical flashpoint remains the application of national security laws, particularly against high-profile individuals or in cases that draw significant international attention. Any further arrests or harsh sentences could trigger renewed diplomatic condemnation and potentially lead to additional targeted sanctions from Western governments. The expansion of digital surveillance, including the linking of private CCTV networks to the police's SmartView system, could also become a flashpoint, raising privacy concerns and potentially fueling public discontent, albeit in a subdued manner due to existing security laws. The US-China technological rivalry and its impact on Hong Kong's commercial entities, as seen with HKT, represent an ongoing risk area, potentially leading to further restrictions or decoupling in critical sectors. Furthermore, global economic instability, exacerbated by geopolitical conflicts like that in the Middle East, poses a significant risk to Hong Kong's financial stability and its role as an international business hub.

Indicators to monitor:

Key indicators to monitor include the frequency and nature of national security arrests and convictions, especially those involving foreign nationals or high-profile figures. Observe the rhetoric and actions of major international bodies and countries (e.g., US, UK, EU, Japan) regarding Hong Kong's autonomy and human rights, looking for signs of escalating diplomatic pressure or new sanctions. Track the implementation and public reception of advanced surveillance technologies like AI facial recognition. Monitor economic indicators such as foreign direct investment, capital flows, and the performance of key sectors (e.g., finance, property) for signs of impact from geopolitical tensions and internal security measures. Finally, watch for any developments in US-China tech and trade relations that could further affect Hong Kong's economic and technological landscape.

Strategic recommendations:

For businesses operating in Hong Kong, it is crucial to conduct thorough risk assessments regarding the National Security Law and its expanding scope, particularly concerning data handling, intellectual property, and employee conduct. Companies should enhance their cybersecurity defenses and incident response plans, recognizing the persistent threat of sophisticated cyberattacks. International actors should maintain a consistent and coordinated diplomatic stance on human rights and rule of law in Hong Kong, while also seeking avenues for constructive engagement with Beijing on broader regional and global issues. Hong Kong authorities, while adhering to national security directives, could explore measures to enhance transparency and public trust in the application of security laws and surveillance technologies, potentially mitigating some international and local concerns.

• Taiwan says closes representative office in Papua New Guinea, blames China (2026-11-07 05:48)

Taiwan said Friday it has decided to close its representative office in Papua New Guinea and withdraw its staff, blaming Chinese coercion of the South Pacific nation for the decision. “In the future, we will allocate relevant resources to friendly nations and other regions with cooperative potential that warrant continued engagement, in order to further […]

• HKFP Lens: The Cathay Camera Club’s Monocolour Exhibition (2026-11-07 01:30)

The Cathay Camera Club has brought together 27 photographers for a new exhibition called Monocolour. “Twenty-seven photographers take a considered approach to capturing colour. The aim is to bring the viewer a deeper understanding of the historic, emotive, cultural, and pragmatic roles that colour plays in our everyday lives,” organisers said. The club was founded […]

• Court rejects ex-press union head Ronson Chan’s bid to take police obstruction appeal to top court (2026-11-07 00:00)

A Hong Kong court has rejected a former press union head’s bid to lodge a final appeal against his conviction for obstructing police, for which he was jailed for five days. Deputy High Court Judge Lily Wong on Friday refused to grant Ronson Chan, a former chair of the Hong Kong Journalists Association (HKJA), a […]

• Joshua Wong sentencing: Local gov’t, police, officials hail 10-year jail term amid condemnation from foreign gov’t’s, NGOs (2026-11-06 10:16)

Jailed Hong Kong pro-democracy activist Joshua Wong was sentenced to 10 years’ imprisonment on Thursday after pleading guilty to conspiring to collude with foreign forces, his second conviction under a Beijing-imposed national security law. See also: Joshua Wong sought leniency to be freed in his 30s, mitigation letter reveals HKFP rounds up local and international […]

• Security chief Chris Tang says gov’t will facilitate Wang Fuk Court fire anniversary events if ‘lawful’ (2026-11-06 08:44)

Authorities will assist people wishing to commemorate the victims of the Wang Fuk Court blaze on the tragedy’s anniversary later this month, on the condition that such activities are “lawful,” Hong Kong security chief Chris Tang has said. Tang made the remarks when

addressing reporters at an event on Thursday, some three weeks ahead of […]

• ‘6 years in jail has reshaped my view of life’: Joshua Wong sought leniency to be freed in his 30s, mitigation letter reveals (2026-11-06 07:44)

Jailed Hong Kong activist Joshua Wong has said in a mitigation letter submitted to court before his sentencing on Thursday that his six years in prison reshaped his outlook on life, asking for the utmost leniency so he could walk free in his thirties. High Court judge William Tam sentenced the activist to 10 years’ […]

• Au Kam San: The teacher-turned-lawmaker who called ‘bluntly’ for democracy in Macau (2026-11-06 06:30)

Former Macau lawmaker Au Kam San was once a leading figure in the Chinese casino hub’s fight for democracy, but will spend the next decade behind bars after he was found guilty on Friday of “subversion”. Au, who was sentenced to 12 years and six months in jail, was also accused of “building links with […]

• Police say linking mall cameras to AI facial recognition network complies with Hong Kong privacy laws (2026-11-06 04:47)

Equipping Hong Kong’s CCTV network with AI facial recognition software and connecting it to shopping mall security cameras would not breach local privacy laws, police have said. Police have said that the AI facial recognition feature will be added to the city’s SmartView surveillance system as early as this month, with four private shopping malls […]

• Hong Kong national security police arrest man over allegedly importing ‘seditious’ books (2026-11-06 04:13)

Hong Kong national security police have arrested a man over allegedly importing “seditious books” in the latest law enforcement action following a crackdown on independent bookstores earlier this year. Police said in a statement on Thursday that they had arrested a 34-year-old man in Mong Kok. He was suspected of “importing a publication that has […]

• Macau sentences ex-lawmaker to 12.5 years in first national security trial (2026-11-06 03:51)

A court in the Chinese territory Macau convicted on Friday ex-lawmaker and democracy campaigner Au Kam San of several offences including subversion, sentencing him to 12 years and six months in prison. Au, 69, is the first person convicted under national security laws widened in 2023 in Macau, the former Portuguese colony and casino hub […]

• Hong Kong installs HK$5m ‘anti-terrorism’ crash bollards outside Causeway Bay dep’t store (2026-11-06 01:25)

Hong Kong authorities have installed “anti-terrorism” collision bollards outside a department store in Causeway Bay, one of the city’s busiest shopping districts – a project with a HK$5

million price tag. The bollards, which were still wrapped in foam sheeting on Thursday morning, were initially proposed in January by the police, the Transport Department, and […]

• Elderly woman jailed for 20 days, fined HK$3,000 over slapping child in Kwun Tong mall (2026-11-05 23:12)

An elderly woman has been jailed for 20 days and fined HK$3,000 over a fight in a Kwun Tong shopping mall, in which she was filmed slapping a child. Leung Lai-ha and co-defendants Xu Yang and Ng Ka-wun appeared at Kwun Tong Magistrates' Courts on Thursday. They faced charges of fighting in a public place […]

• 'Truly reflective of his offence': Police welcome 10-year prison sentence for activist Joshua Wong amid int'l outcry (2026-11-05 10:07)

The National Security Department of the Hong Kong Police Force has welcomed the 10-year prison sentence handed to Joshua Wong, saying that it was a "proper sentence" to reflect the offence committed. Steve Li, chief superintendent of the National Security Department of the Hong Kong Police Force, told reporters on Thursday outside the High Court […]

• China dismisses accusations of 'squeezing out' other economies (2026-11-05 07:35)

China's vice premier brushed off "completely unfounded" concerns that his country was "squeezing out" other economies as he opened a major business fair on Thursday aimed at enticing importers. The United States and European Union regularly accuse Beijing of heavily subsidising its industry and flooding foreign markets with its products, particularly in vehicle and green […]

• What the US midterms mean for ties with China (2026-11-05 06:30)

A sweeping victory for Democrats in US midterm elections this week, giving them control of Congress, presents both an opportunity and challenge for top rival China, analysts say. Here is how the outcome of the vote, which offers the Democratic Party the power to stymie President Donald Trump's maverick foreign policy, could impact the thorny […]

• Hong Kong lawmaker proposes digital ID checks for housing estate votes to combat bid-rigging (2026-11-05 05:08)

A Hong Kong lawmaker has suggested using a government-managed digital platform to verify property owners' identities when casting their ballots in estate meetings, a measure meant to help prevent unauthorised proxy voting. Lawmaker Christine Fong made the proposal at a Legislative Council (LegCo) meeting on Wednesday on combatting bid-rigging, an anti-competitive practice in the building […]

• Jailed Hong Kong activist Joshua Wong sentenced to 10 years over foreign collusion (2026-11-05 03:07)

Jailed Hong Kong pro-democracy activist Joshua Wong has been sentenced to 10 years' imprisonment after pleading guilty to conspiring to collude with foreign forces, his second conviction under a Beijing-imposed national security law. Wong, who turned 30 in jail last month, appeared calm on Thursday as his sentence was handed down at the High Court. [⋯]

• Tai Po fire: Former top official urges gov't to publish building inspection report to clear buyout doubts (2026-11-04 23:30)

A former top Hong Kong official has called on the government to release a structural inspection report of the fire-ravaged Wang Fuk Court to dispel the concerns of homeowners who have rejected the government's apartment buyback offer. Hong Kong's former secretary for transport and housing Anthony Cheung said in an op-ed published in Ming Pao [⋯]

• China seeks arrest of five Uyghurs held in Thailand: Bangkok (2026-11-04 10:02)

Five Uyghurs detained in Thailand since 2014 are subject to Chinese arrest warrants, the kingdom's security chief said Wednesday, adding that a court would decide if they would be returned to China. Human rights groups have raised concerns about the men — members of the Muslim minority group who activists say are persecuted in China [⋯]

• US President Donald Trump congratulates Democrats on midterms, says Iran war played role (2026-11-04 07:29)

President Donald Trump had rare praise for rival Democrats Tuesday after their stunning US midterm elections victory and admitted the Iran war may have played a part in the defeat of his Republican Party. But the 80-year-old refused to take any personal responsibility for the result that upends the final two years of his presidency, [⋯]

• Hong Kong records GDP rise of over 5% in first three quarters, marking strongest growth in 5 years (2026-11-04 04:46)

Hong Kong has seen a strong GDP increase of over 5 per cent in the third quarter of 2026, bringing the growth for the first nine months of the year to a five-year high. Driven by accelerating growth in exports and solid domestic demand, the city's GDP grew by 5.2 per cent in the third [⋯]

• Finance portal MoneySmart apologises after users' sensitive data accessed in IT system hack (2026-11-04 01:30)

Online finance portal MoneySmart told customers on Tuesday that became aware of a data breach last Thursday after hackers compromised its internal IT systems. "These systems hold personal data that customers share with us when they compare or apply for financial products through MoneySmart," it said, according to the email seen by HKFP on Tuesday. [⋯]

• Hong Kong BN(O) visa holders exempt from UK plan to double settlement wait to 10 years, but face tougher English requirement (2026-11-04 00:45)

Hong Kong BN(O) visa holders in the UK will be exempt from a proposal to double the qualifying period for settlement to ten years from 2027. On Monday, UK Home Secretary Shabana Mahmood laid out an immigration overhaul under which those on work visas would no longer automatically gain permanent residency after five years. Refugees […]

• Anti-corruption watchdog charges ex-Johnson Cleaning execs over alleged bribes worth over HK$75m (2026-11-03 23:39)

Hong Kong's anti-corruption watchdog has charged two former senior Johnson Cleaning Services executives who allegedly accepted bribes worth over HK$75 million. William Fung, 54, former director of the firm and former chief executive officer of Johnson's parent company, appeared at Kwun Tong Magistrates' Courts on Monday alongside Jimmy Lee, 57, former general manager of Johnson. […]

• Crypto.com to shut consumer-facing app in Hong Kong next Feb (2026-11-03 23:34)

Singaporean cryptocurrency exchange company Crypto.com will shut its consumer-facing app on February 1 next year, it said on Tuesday. "This decision reflects our ongoing efforts to optimise global operations and allocate resources where we see the most sustainable long-term opportunities," a spokesperson told HKFP on Tuesday. "All impacted customers have received advance notice, we will […]

• Hong Kong prisoner support group says Customs confiscated over 60 books imported from Taiwan (2026-11-03 23:30)

A Hong Kong group that supports people jailed in politics-related cases has said that authorities have confiscated more than 60 books imported from Taiwan for its partner retail outlet. Waiting Bird said in a social media post on Monday that it was meant to receive a shipment of books from Taiwan on October 13, but […]

• Hong Kong police arrest 61-year-old man over suspected drink spiking of Japanese DJ Mao Hamasaki (2026-11-03 08:12)

Hong Kong police have arrested a 61-year-old man for allegedly spiking drinks and drugging a Japanese DJ at a Halloween party. Police said on Tuesday that the suspect was arrested the previous day in Central on suspicion of "administering poison with intent to injure." He has been detained for investigation. Mao Hamasaki, a former adult […]

• Legislature's legal advice arm urges clarity on public interest rules as gov't moves to tighten land records access (2026-11-03 06:22)

The Hong Kong legislature's legal services arm has asked the government to clarify how it would consider applications to access the city's land records on the basis of public interest after passing new rules to tighten media access. The Legislative Council's (LegCo) Assistant Legal Adviser Vanessa Cheng posed the questions in correspondence addressed to the […]

• Sea drone makers compete in Taiwan for soaring investment (2026-11-03 05:50)

Silver-hulled sea drones skim across the water as part of an exhibition in Taiwan where local and foreign companies are competing for a share of surging government investment in uncrewed vehicles to deter China. As Chinese military pressure increases, Taiwan is pouring billions of dollars into aerial and sea drones, which have been widely used […]

• Jailed activist Joshua Wong to be sentenced on Thursday in 2nd national security trial (2026-11-03 04:56)

A Hong Kong court has set Thursday to sentence pro-democracy activist Joshua Wong in his second national security case, which could carry a sentence of up to life imprisonment for the 30-year-old former student leader. High Court Judge William Tam is set to hand down the sentence for Wong’s conviction for foreign collusion at 9.30am […]

• Yuen Long district councillor jailed for 2.5 years over unlawful sexual intercourse with 13-year-old girl (2026-11-03 04:15)

A Yuen Long district councillor found guilty of having unlawful intercourse with a girl under 16 has been jailed for two and a half years, with the judge saying he lacked remorse. Sei Chun-hing was sentenced at the District Court on Monday after his conviction in September. He was found guilty of having unlawful intercourse […]

• China calls for Mideast dialogue in talks with Iran, Saudi, Oman (2026-11-03 02:43)

China stepped up diplomatic efforts on Monday to resolve the Middle East crisis, urging a return to the negotiating table in back-to-back meetings with Iranian, Omani and Saudi officials in Beijing. The meetings come days after US President Donald Trump issued a fresh war threat more than eight months into the conflict, which was triggered by […]

• Gov’t departments received 180 complaints about smoking, fire safety before Wang Fuk Court fire: report (2026-11-02 23:45)

Hong Kong government departments received 180 complaints or enquiries, ranging from construction workers smoking and renovation materials suspected not to have met fire safety standards, ahead of the deadly Tai Po fire last year, an investigation has revealed. Released last Thursday, an investigation report into the Wang Fuk Court blaze detailed almost 200 pages of […]

• Chinese Communist Party outlines closer scrutiny of officials (2026-11-02 11:46)

The Chinese Communist Party is set to tighten oversight of its officials by scrutinising their assets and online activities, according to a party document released on Sunday. The document from the CCP’s powerful Central Committee was published by the Xinhua state news agency following this week’s annual plenary session in Beijing, which focused on governance […]

• Hong Kong top court rejects actor Gregory Wong's final appeal over 2019 LegCo rioting conviction (2026-11-02 10:30)

Hong Kong's Court of Final Appeal has dismissed an appeal bid by actor Gregory Wong to overturn his rioting conviction and sentence over the storming of the Legislative Council (LegCo) during the 2019 protests and unrest. An Appeal Committee of the Court of Final Appeal comprising permanent judges Roberto Ribeiro and Johnson Lam, alongside non-permanent [⋯]

• Ex-Apple Daily publisher joins mainland tour for 'rehabilitated persons', praises China in TV interview (2026-11-02 10:13)

Former Apple Daily publisher Cheung Kim-hung, who was convicted of foreign collusion and jailed for six years and nine months, has joined a government-organised tour to Shenzhen, praising China's development in an interview with a state-owned broadcaster. The one-day tour, arranged for "rehabilitated persons" by Hong Kong's Correctional Services Department, sought to "smash prejudices and [⋯]

• Tai Po fire: Hong Kong Bar Assoc. urges sweeping overhauls with 'two-envelope' tendering and safety blacklist (2026-11-02 07:40)

A task force on last year's deadly Tai Po fire under the professional body for Hong Kong barristers has backed a move to criminalise bid-rigging and proposed 50 legal reforms, including a strengthened tendering mechanism designed to bar colluding cartels from bidding for projects. The Hong Kong Bar Association's Tai Po Fire Taskforce on Law [⋯]

• Hong Kong records hottest October in at least 142 years, with mean daily high of 30.5°C (2026-11-02 06:33)

Hong Kong has sweltered through its hottest October since records began nearly a century and a half ago, figures from the Hong Kong Observatory have revealed The mean daily maximum temperature over the month was 30.5 degrees Celsius, 2.4 degrees higher than normal. The mean temperature and mean daily minimum temperature, at 27.6 and 25.8 [⋯]

• Tourism Board axes controversial Peak lighting project following backlash (2026-11-02 04:37)

The Hong Kong Tourism Board (HKTB) has scrapped a controversial lighting project on The Peak following complaints from residents and trail users that it would ruin the natural environment. In a paper submitted to the Central and Western District Council, the HKTB said it had met with district councillors and conducted site visits with lawmakers [⋯]

• Pushed not jumped: What a 19th-century shipwreck reveals about Hong Kong's political casualties (2026-11-02 01:10)

From an anthropological point of view, the government reaction to the Wang Fuk Court fire inquiry report makes for interesting reading. It criticised four arms of the government, after 168 people were killed in last November's blaze in Tai Po. Also, after a major catastrophe, one

might question the future of the Chief Executive. However, […]

• Technopole to University Towns: Why Hong Kong's Northern Metropolis shifted focus from hi-tech to higher ed (2026-11-01 23:45)

Government ministers, academics, and business leaders gathered at a Hong Kong auditorium for a two-day summit last week to discuss an ambitious project: building three universities towns in a sprawling area near the city's border with mainland China. Hong Kong is betting on the multibillion-dollar Northern Metropolis project, which is set to transform about 300 […]

• China state TV does not air first La Liga games since Mbappe furore (2026-11-01 03:56)

Chinese state television did not air on Saturday the first La Liga games since Real Madrid star Kylian Mbappe caused anger with a joke about the country's former leader Mao Zedong. It was not immediately clear whether state broadcaster CCTV had scheduled screenings of the matches and then cancelled them, or whether they were not […]

• Zhang Shengmin, Xi's lone 'hatchet man' at the top of China's military (2026-11-01 03:45)

Zhang Shengmin, the last general remaining in the highest echelon of China's military, has received an unexpected promotion to the Politburo, the rarefied group of about 20 Communist Party officials who run the country. It is a significant milestone for the 68-year-old, who has risen from his modest upbringing to become a quiet architect of […]

• 'Groundless speculation': China denies spying on Nvidia's Jensen Huang (2026-10-31 04:25)

Beijing dismissed as "groundless speculation" on Friday a report that said Jensen Huang, head of US chip giant Nvidia, was the target of a Chinese spy plot. The article by The New York Times, published Thursday, said that US intelligence officials concluded that a Chinese executive linked to a Singapore-based data centre company had been […]

• US imprisons two Chinese nationals who tried to recruit military service members to spy for Beijing (2026-10-31 04:13)

Two Chinese men who admitted trying to recruit US military service members to spy for Beijing were imprisoned in California on Friday. Liren Lai and Yuance Chen were ordered to serve 30 months in a federal lockup and to undergo three years of supervised release after pleading guilty to acting on the orders of China's […]

• 'I am not important': Security chief defends staying in post following Wang Fuk Court fire inquiry (2026-10-31 00:00)

Hong Kong's security chief has said that his duty to society, the city, and the country outweighs his personal interests, after facing questions over his political accountability for last year's fatal Tai Po fire. Secretary for Security Chris Tang offered an apology to the public on

Friday over last November’s blaze at Wang Fuk Court, [⋯]

- US enterprises 'surprise' in latest HK strategic batch (2026-11-07 05:08)

The United States is the largest source of overseas firms in Hong Kong’s latest batch of companies welcomed by the Office for Attracting Strategic Enterprises (Oases). Last month, Oases welcomed 18 enterprise partners in its seventh batch, bringing the cumulative number of strategic enterprises attracted to Hong Kong to 142. "In terms of overseas enterprises, you may be a bit surprised, but the United States has the largest number; of course there is also Europe," said Oases director-general Peter Yan on an RTHK radio programme on Saturday. "This time I am also very happy that for the first time we have a Korean enterprise coming to Hong Kong and also a Japanese enterprise coming to Hong Kong as strategic enterprises." On the mainland side, Yan said the enterprises came from various cities such as Beijing, Shanghai and Shenzhen. " This time we also explored more other cities that are quite outstanding, especially in advanced manufacturing and new energy; we are also attracting them," he said. "In medical technology, other cities are also developing quite well – for example, Hangzhou in AI, and Nanjing and Suzhou." Yan said artificial intelligence and life and health technology are two relatively large sectors represented in the batch, with each accounting for about 30 percent of the total, while fintech and new energy each accounted for more than 10 percent. The 142 strategic enterprises that have settled in Hong Kong, he enumerated, have committed to a total investment of HK$84 billion and will create about 26,700 high-end jobs. His office has been monitoring and following up on the companies’ development, and both capital investment and job creation have now exceeded their targets. Looking at the first six batches of strategic enterprises, Yan said capital investment has exceeded pledged figures by about 30 percent. He added that Oases carefully selects strategic enterprises, gaining an in-depth understanding of about 20 to 30 percent of the companies it contacts and helping them draw up development plans for Hong Kong. Typically, the office contacts companies several months before they settle in the city and follows up for more than a year, discussing their first concrete landing project and matching them with policies or stakeholders such as universities, investors and the business sector to help ensure a tangible industrial contribution. - Colder weather 'may worsen flu risks for children' (2026-11-07 05:01)

A paediatric infectious diseases expert warned on Saturday that colder weather could prolong the current flu season and lead to more critical cases in children. Mike Kwan, president of the Asian Society for Paediatric Infectious Diseases, said that if infection numbers stay high, critical cases will rise in tandem. "Since the weather is going to get more cold, and also we are going into the winter season, I really worry that the current flu season will merge with the winter flu season," he said. "So then you experience a very, very long period of the flu infection. And subsequently... [I am] really worried that there will be more paediatric critical cases or even

mortality." Kwan urged parents whose children had yet to receive this season's influenzavaccine to get them vaccinated as soon as possible. Edited by Robert Kemp

- Firefighters tackle blaze at paper offering warehouse (2026-11-07 01:15)

A Yuen Long warehouse storing paper funeral offerings caught fire on Friday night. The blaze in Pak Sha Tsuen began just before 11 pm. About half an hour later, the Fire Services Department upgraded it to a No. 3 Alarm, the third highest on a scale of five. Firefighters deployed three jets and three breathing apparatus teams. They managed to put out the blaze before 3 am. Police say 12 people were evacuated. No one was hurt. Edited by Robert Kemp

- Evening News on TV32 - Nov 6 (2026-11-06 12:33)

Top stories for Friday, Nov 6, 2026 - The Exchange Fund records a third-quarter investment income of almost $19 billion. - Police say they will roll out facial recognition technology across their CCTV network this month. - Protests have erupted across Paraguay after one of the country's largest banks was shut down over a solvency crisis.

- 28 nabbed in first task force raid against bid-rigging (2026-11-06 11:18)

Authorities said on Friday that 28 people were arrested in an operation against a suspected triad-linked bid-rigging syndicate targeting building maintenance and renovation projects. Secretary for Security Chris Tang said it was the first operation by the joint task force made up of police, the ICAC and the Competition Commission, which was set up after the Wang Fuk Court fire last year. Tang said the syndicate was looking to cash in before the government's anti-bid-rigging policies takes effect. Under pretexts such as fluctuating material prices and the urgent need to start works, it tried to get homeowners to sign contracts quickly, so its preferred engineering consultants and contractors would be selected in a bid to rake in huge profits at the last minute, he said. "The syndicate involved at least 20 buildings or estates, including 12 that have already awarded the contract and eight that have yet to award the contract," the security minister told reporters. "The awarded sum is about HK$100 million and the to-be-awarded amount is also about HK$100 million." Officials will contact the owners' corporations of the affected estates to offer assistance. Those arrested include directors and staff from a property management company, six contractors and 10 consultancy firms, along with one member of an owners' corporation. Several arrestees, Tang said, were suspected to have triad affiliations. They were arrested for offences including deception, forgery, conspiracy to defraud and conspiracy to offer an advantage to an agent, among others. Separately, police smashed seven illegal premises suspected to be controlled by triads across the city and arrested 38 people. Tang said the syndicate allegedly funnelled profits from bid-rigging to illegal gambling dens and vice establishments. He added a 24-hour hotline and a reward scheme have been set up to encourage the public to report suspected bid-rigging, with all information kept strictly confidential. Edited by Edmond Fong

- 'Unlimited land searches raise privacy concerns' (2026-11-06 09:07)

A development official on Friday said a lack of restrictions for land record searches may lead to privacy concerns, prompting the authorities to adjust the mechanism. Her remarks came after the government proposed legislative amendments, saying land record searches must meet one of nine specified purposes. Speaking to lawmakers, Permanent Secretary for Development of Planning and Lands Doris Ho said there should be room for the media to carry out investigative reporting by allowing the search in the public interest, including the reporting of large-scale unauthorised building works. “We believe that there should be a mechanism – a not too difficult one – for the media to carry out reporting that serves public interest,” she said. “We want to have this type of reporting. Therefore, although an application and some information will be required in the future… we believe the chance of approval is very high.” Ho added that although there is no appeal mechanism, if an application is rejected, the applicant could submit grounds that were not previously provided for authorities to reconsider. Authorities are also looking at the introduction of a mechanism to inform home owners whose properties are being searched, she said. Edited by Aaron Tam

- Record 400-plus HK firms join Shanghai import expo (2026-11-06 08:04)

A record high of more than 400 Hong Kong businesses are taking part in the China International Import Expo in Shanghai hoping to use the event as a launchpad for entry into the mainland market. Among the first-time exhibitors is a Hong Kong accounting firm, which has seen a 30-percent surge over the past year in mainland clients seeking to expand overseas. Man Law, CEO of the firm's greater China division, told RTHK that venturing abroad was no longer just a trend, but a practical necessity for managing risks and driving growth. The expo, he said, is an ideal stage to highlight Hong Kong's role as a springboard for international growth, particularly through tax incentives. "Suppose you have set up an office and hired staff in Hong Kong," Law said. "When expanding into Southeast Asia or investing in other foreign markets, you can take advantage of the double taxation avoidance agreements signed between Hong Kong and many countries. "At their peak, tax savings could exceed 50 percent." Another first-time exhibitor is a craft brewery that is working up a thirst at the expo for its award-winning, Hong Kong-made beer. The brewery's marketing director said the brand aims to tap the mainland market, confident that its craft beers will be competitive as many mainland consumers have a strong appetite for Hong Kong products. The event has also drawn local academic institutions, including the Hong Kong Polytechnic University. PolyU vice-president Zheng Zijian said the university, which has established 12 research institutes on the mainland over the past three years for incubation programmes, has brought innovation projects such as robots and food technology to the expo. The institution, he stressed, has benefited from the mainland's comprehensive domestic industrial chain and robust support from local governments. “Our practice over the past few years is to take the path of deep integration with the mainland and contribute to integration with the country's talent, science and technology, and education,” Zheng said. - Police honour fallen officer Chu at memorial (2026-11-06 07:29)

Police paid tribute to senior police constable Chu Chun-kwok, who died in September, at the Force Remembrance Day ceremony on Friday. Chu was paralysed after he was attacked while on duty in 2005 and passed away this year at the age of 52. The ceremony was led by police commissioner Joe Chow, who joined police representatives in honouring full-time and auxiliary officers killed in the line of duty. In his address, Chow said the fallen officers had given their lives for Hong Kong’s safety and stability. Their example, he added, places a responsibility on current officers to carry on the values and work they stood for. Turning to Chu, Chow said his death, along with the sacrifices of other fallen officers, showed a firm commitment to protecting the public and their property and to moving the force forward. He described their dedication as a guide for the force as it seeks to improve and meet future challenges. Chow also said the sacrifices of those who came before had created a strong foundation for both the force and society, and urged officers to remain united and committed to serving the community. The ceremony included the sounding of the "Last Post" and a two-minute silence. Wreaths were laid by Chow, police commandant Johnny Leung and representatives of police formations and associations before the Books of Remembrance, which list the names of fallen officers. - Choi to seek additional funding for university towns (2026-11-06 06:47)

Secretary for Education Christine Choi said on Friday that her bureau would seek additional funding for the development of university towns at the Northern Metropolis. In an interview with a local news outlet, she said universities would require much more funding from the financial secretary than the HK$10 billion loan set aside for them to build campuses there. However, she also pointed out that the government had to take into consideration a need to prioritise public funding allocations. Given that the development at the three university towns – located in San Tin, Hung Shui Kiu and Ta Kwu Ling – would be carried out in phases, Choi said she believed institutions would not need to go heavily into debt in the process. The government has been taking applications for the three sites slated for the Hung Shui Kiu University Town, which spans around 26 hectares in total, since September. Choi said institutions need not to be in a hurry to compete for the sites, as they only account for less than 10 percent of the 300-hectare Northern Metropolis university town area. On whether leading universities from outside the SAR would also participate in the project, Choi said she believed they would be inclined to collaborate with local institutions in setting up joint laboratories and research centres, as they have to take into consideration their finances and the geopolitical situation. At a Legislative Council panel meeting, Choi said the SAR’s university town plan is very different from the ones on the mainland by having compounding advantages that place Hong Kong in a unique position. For instance, she said, the city is highly international and diversified. “Our institutions have long enjoyed a globally renowned reputation in academic and research fields," Choi said. "Also, in terms of our ability to attract top talent as well as in aspects such as policies and the legal system, Hong Kong also has unique advantages.” Choi added that Hong Kong would also complement other university towns on the mainland. - Exchange Fund makes HK$18.6bn as tough quarter looms (2026-11-06 06:06)

The Hong Kong Monetary Authority said on Friday it chalked up an income of HK$18.6 billion from Exchange Fund investments in the third quarter as its chief executive warned of uncertainties in the fourth quarter. Gains from investments in Hong Kong stocks came in at HK$9.1 billion while the return from bond investments only amounted to HK$300 million. Investments in other equities contributed HK$1.5 billion while foreign exchange investment brought HK$7.7 billion. The authority said total investment income in the first three quarters of this year amounted to HK$171.9 billion. Speaking after attending a meeting of the Legislative Council’s financial affairs panel, authority chief executive Eddie Yue said the fund's performance would continue to fluctuate this quarter, describing it as a “difficult quarter with uncertainties”. The uncertainties run the gamut from Middle East tensions, financial conditions in major markets, to developments on the artificial intelligence front. “The US midterm election results have drawn market attention to whether the AI build-out and data-centre construction will slow down, as many states appear to be resistant to it,” Yue pointed out. “This also contributed to the volatility in the stock market [on Thursday night].” However, Yue emphasised that the Exchange Fund is a long-term venture and that people should look at its long-term returns rather than focus on short-term results. The authority, he also stressed, has been maintaining a diversified allocation of assets to make the portfolio more defensive. Edited by Aaron Tam

- Privacy chief backs tighter land-search rules (2026-11-06 04:01)

Privacy commissioner Ada Chung expressed support on Friday for government moves to tighten land record search arrangements, while raising concerns that misuse of land registry data may be getting worse. Her comments come as the government tabled eight pieces of subsidiary legislation in the Legislative Council for the changes. Under the new arrangements, land searches must meet one of nine specified purposes. Speaking on RTHK, Chung said the purposes – which could be part of property deals and valuations – had to be concrete and clear so searchers would stick to declarations of their intended use of the data and not stray into potentially misusing it. She said her office had received 20 complaints in five years about alleged misuse of land registry data, which included instances where owners were doxxed on social media, and the sending of promotional mail. Six complaints came this year alone, Chung pointed out. "We've seen cases where land registry data was used for ... other purposes such as cyberbullying and doxxing. Not a single case of that kind should happen, and we've already had six this year, so the trend is worsening," she said. Chung said the new rules on land searches make the system clearer, better protect owners' privacy, and help people to avoid breaking the law. She noted that the Personal Data (Privacy) Ordinance's exemption for journalistic activities also requires a public-interest basis, matching the purpose of the new arrangements. Edited by Aaron Tam

- 'FundHK' crowdfunding website not associated with RTHK (2026-11-06 03:53)

Radio Television Hong Kong (RTHK) said on Friday it has no ties with a crowdfunding website operating under the name “FundHK” that used the acronym “RTHK” in its promotional

materials and claimed that “RTHK” is one of its “media and institutional partners”. " RTHKhereby clarifies that it has no affiliation, partnership, collaboration, authorisation, endorsement,or any other form of relationship whatsoever with FundHK or its operating entity," an RTHKstatement said. The broadcaster said any representation suggesting otherwise is unauthorisedand does not reflect the position of RTHK. It said members of the public who suspect fraud orbecome aware of any potentially unlawful activities are advised to report the matter to policeimmediately and seek appropriate assistance. Edited by Aaron Tam

- HK can help 'bend the curve' on rising drug costs: FS (2026-11-06 03:41)

Financial Secretary Paul Chan on Friday said Hong Kong can play a key role in reversing the rising cost of bringing new medicines to patients, as he opened the third International Bio-Computing Innovation Summit in the SAR. In his opening speech, Chan drew on two contrasting "laws" to frame the challenge facing the life sciences industry. Moore's Law describes how the cost of computing power has gone down – while medicine is going down the opposite path. For some seven decades, he said, the cost of bringing a new drug to patients roughly doubled every nine years, a phenomenon known as Eroom's Law. "Behind that rising curve are promising treatments that were never able to secure funding, and patients waiting for better medical options," Chan said. "Eroom's Law describes the past. It needs not dictate the future." Chan identified three forces that could help "bend the curve", and said Hong Kong could contribute to each. The first is the power of computing to transform biological research, he said, as gene sequencing becomes cheaper and AI allows scientists not only to read the code of life, but to model and "write" it – designing molecules, antibodies and enzymes rather than relying on laboratory trial and error. He noted that a drug discovered by generative AI entered phase three clinical trials this year, and that the company behind it is listed in Hong Kong. Regulators, he added, are beginning to accept evidence from computer models and alternatives to animal testing. The second force, Chan said, is the changing geography of drug innovation. " China now is no longer just a market for global pharmaceutical companies. It has become an indispensable part of their global research and development network," he said, noting that overseas licensing deals for innovative drugs from China reached nearly US$140 billion in total value last year, almost 10 times the level in 2021. The third force is capital – "not just how much we invest, but how well we put it to work," he said. He highlighted the power of the city's capital markets, noting Hong Kong has become the world's second-largest fundraising centre for biotechnology since listing reforms for pre-revenue biotech firms in 2018. Chan said Hong Kong's role is increasingly clear: to bring models, patients, markets and capital together, and reduce the time and cost of bringing new treatments to market. He pointed to the establishment of the Hong Kong Centre for Medical Products Regulation, efforts in Hetao to make it easier for data and biosamples to move across the boundary, the new Life and Health Technology Research Institute, and a third medical school being built with HKUST. "If this is the decade in which we finally bend that curve, let Hong Kong play a part in making it happen," he said. Edited by Aaron Tam

- GBA offers limitless opportunities for laywers: Lam (2026-11-06 03:11)

Secretary for Justice Paul Lam has called on legal practitioners from the two SARs to obtain Greater Bay Area (GBA) practice qualifications to tap into the area's limitless opportunities. The GBA lawyers' scheme – which allows those qualified to practice in nine mainland cities – was regularised in September after a six-year pilot run. Speaking at the Second Guangdong-Hong Kong-Macao Greater Bay Area Lawyers Forum that was held during the Legal Week on Friday, Lam said more than 700 legal practitioners from Hong Kong and Macao have so far obtained the qualification. "The Greater Bay Area has the characteristic of 'one country, two systems and three jurisdictions'," he said. "Greater Bay Area lawyers with dual practice qualifications will serve as pioneers." Lam noted that the GBA is among the areas with the highest degree of openness and strongest economic vitality in the country. Hong Kong, he said, will step up the closer interface of rules and laws on the safeguards of the rule of law in the GBA, as laid out in its inaugural five-year plan. With more than 900 participants attending the event at the Convention and Exhibition Centre in Wan Chai in-person or online, the minister urged them to take the chance to understand the latest GBA developments, grasp new opportunities and expand into new fields. Edited by Aaron Tam

- Police to deploy facial recognition on CCTV networks (2026-11-06 00:51)

Police said facial recognition technology will be rolled out across its CCTV network this month to assist in criminal searches and locate high-risk missing persons, with some of the captured data stored for up to 180 days. Officers said they have so far installed around 10,000 cameras under the SmartView initiative, alongside connections to a further 10,000 from other government departments and public organisations. Covered locations include, among others, Kai Tak Sports Park, Hong Kong International Airport, cross-harbour tunnels, MTR stations and public housing estates. Superintendent Raymond Cheng said the facial recognition feature can be activated anytime on all police cameras, as well as third-party feeds integrated into the SmartView system. However, he explained that the feature will only be triggered during active criminal searches or to locate high-risk missing persons, to save resources. "For the 24 hours analysis, not all of them can be used at the same time because of the resources," Cheng said. "But if we need to use, we can spend the resources on particular CCTV, and of course it can be used around the clock." In separate pilot tests, police said the facial recognition technology has already helped them arrest a robbery suspect and locate an elderly man with dementia within 1.5 hours of being reported missing. Officers said CCTV footage will only be kept for a maximum of 31 days. However, photos of individuals captured by the facial recognition technology, along with metadata such as location, date, time, and facial characteristics, will be retained for 180 days. Meanwhile, police revealed that at least four shopping malls have agreed to connect their CCTV feeds to the police network. RTHK understands these include Tuen Mun Town Plaza, Olympian City, Kwai Chung Shopping Centre, and Sierra Life in Fanling. Cheng said malls that have installed CCTV cameras are required by law to display signs warning people that recording is in progress. However, the superindendent noted the Department of Justice (DOJ) advised that it should be voluntary for malls to disclose whether their CCTV feeds are connected to the police network. "We will follow the advice from the DOJ to encourage shopping malls or the

organisations to post our notice to announce that our system is connected with their CCTV," Cheng added. Police have been installing cameras in public places with high crime rates andheavy pedestrian flow since 2024, aiming to reach a target of 60,000 cameras by 2028 to coverthe entire city. An additional 6,500 cameras will be installed in the developing NorthernMetropolis after 2028, bringing the total number of public surveillance cameras to around66,500 in 2031. Since the project began, the force said its CCTV network has helped solve nearly2,200 criminal cases, including murder, robbery, and arson, leading to more than 2,800 arrests.Edited by Aaron Tam

- Evening News on TV32 - Nov 5 (2026-11-05 12:40)

Top stories for Thursday, Nov 5, 2026 - Chief Executive John Lee calls Joshua Wong a primary culprit in undermining Hong Kong's prosperity and stability, as the former activist gets a 10-year jail term for violating the National Security Law. - The China International Import Expo opens in Shanghai. - Americans react to the Republicans' crushing defeat in the midterms.

- Tang condemns external smearing over Wong sentence (2026-11-05 10:13)

Secretary for Security Chris Tang strongly condemned on Thursday attacks by external forces following the sentencing of former activist Joshua Wong, who was imprisoned for 10 years after pleading guilty to conspiring with foreign countries or external elements to endanger national security. Tang said the court, in passing sentence on Wong, found that he, Nathan Law, who has absconded, and others had continued to collude with foreign officials and outlets in calling for sanctions and hostile measures against the nation, Hong Kong and their officials. He reiterated that Wong was sentenced under fair and open judicial proceedings, showing that the SAR abides by the rule of law. "Those launching attacks against us are exactly the same external forces that Wong and Law attempted to collude... They must be strongly condemned, and Hong Kong citizens must recognise and acknowledge that clearly," Tang said. Speaking outside the High Court earlier on Thursday, Steve Li, chief superintendent of the police's national security department, said Wong had taken part in social movements from a young age and committed various offences in adulthood. Li said he hoped Wong would reflect on his wrongdoings. "I sincerely hope that for the rest of his time in prison, apart from reflecting on the wrongdoings he has done to the country and to the Hong Kong SAR, he must seize the opportunity to learn how to respect the law and properly understand his own country," he said. Edited by Tony Sabine

- DOJ launches HK$20,000 lawtech funding scheme (2026-11-05 09:48)

The Department of Justice has launched a funding scheme aimed at helping small and medium-sized law firms and newly qualified barristers adopt legal technology. The Funding Scheme for LawTech Solution Subscription, managed by the Law Society of Hong Kong and the Hong Kong Bar Association, will provide eligible applicants with up to HK$20,000 for a one-year subscription to designated legal technology services. The list covers services from 14 local, mainland and overseas providers, spanning legal research, document drafting, workflow

management and hearing support. Eligible applicants are sole practitioners, Hong Kong lawfirms with five or fewer partners, and barristers with no more than seven years of call. Speakingto reporters at Hong Kong Legal Week on Thursday, Deputy Secretary for Justice Horace Cheungsaid the pilot scheme would ease the financial burden on applicants seeking to improve theirability to adopt lawtech services. "We hope that we can use such kind of financial incentive toencourage them to use the lawtech tools in their practice and we believe that after this pilotscheme, they will know how good the legal tool can help them in their practice," he said. "Iwould say that is only the beginning. Certainly we will monitor the progress of the pilot schemeand see what we can do further for the legal sector in the years ahead." Cheung also said theDepartment of Justice would release guidance notes on the application of technology in legalpractice. The notes, he said, are intended to give the legal profession principles to consider andpractical advice on adopting legal technology, helping practitioners guard against potential riskswhile remaining mindful of their ongoing professional responsibilities. Meanwhile, José-AntonioMaurellet, chairman of the Hong Kong Bar Association, said the scheme was timely andfar-sighted and would benefit about 500 members. He believes it would encourage youngermembers to invest more time and resources in training and to stay competitive. Roden Tong,president of the Law Society of Hong Kong, for his part, said the Department of Justice hadintroduced the scheme for a second time, adding that the support helped the legal professionmake better use of technology and improve efficiency. The application deadline is January 29.Edited by Tony Sabine

- HK 'to widen trade reach to help nation go global' (2026-11-05 08:29)

Chief Executive John Lee on Thursday said Hong Kong would continue to expand its international trade network to better contribute to the country's overall development. Speaking at the Hong Kong sub-forum of the Hongqiao International Economic Forum in Shanghai, he noted the event was the first major conference held by the SAR since the unveiling of its first-ever five-year plan in September. The conference, Lee said, allowed experts and industry leaders from both the mainland and Hong Kong to gather and explore how the city could leverage its unique position under "One Country, Two Systems" and integrate into national development. One key focus area is trade, he said. “Hong Kong has become the fifth-largest merchandise trading entity in the world, having signed free-trade agreements with 21 economies and investment agreements with 34 economies," Lee said. "The SAR government will continue to expand its international economic and trade network to play a greater role in the country’s high-standard opening up." The world, Lee pointed out, is experiencing a once-in-a-century transformation, which is happening alongside a global supply chain restructuring and rapid technological advancement. He stressed that Hong Kong must proactively plan for its future and implement a forward-looking strategic plan with a calm and measured approach. Another key focus area, Lee said, is finance. Describing it as Hong Kong’s fundamental and greatest area of strength, he stressed that the SAR must consolidate its role as an international financial centre. He added that Hong Kong would strengthen its position as the world's largest offshore renminbi hub to expand the global use of the currency and actively

build a commodity and gold trading ecosystem. Lee also noted that Hong Kong wouldproactively align with national scientific research and industrial strategies, accelerate itsinvestment in science and technology, and help mainland enterprises expand overseas throughits GoGlobal Task Force. Later, Lee toured various booths hosted by Hong Kong enterprises andinstitutions taking part in the China International Import Expo, which is being held concurrentlywith the forum. He listened to a briefing by Hong Kong Polytechnic University representatives,and at one booth, tasted traditional sweetheart cakes — also known as wife cakes. Arepresentative told the chief executive that the pastries have been a huge hit at high-speed railstations on the mainland, adding that they have revamped their packaging to feature HongKong elements on the design, such as trams, to appeal to younger generations. Lee also visiteda craft beer booth to try a brew infused with the flavour of salty-lemon 7Up — an iconic HongKong cha chaan teng drink that mixes 7Up with salted preserved lemon. A representative at thebooth told him that Hong Kong enjoys a major advantage in sourcing raw ingredients thanks tobeing a highly international city. Lee said Hong Kong could host its own beer festival in thefuture, encouraging the business to keep growing and build itself into a premier local brand forsuch events. Frederick Ma, chairman of the Hong Kong Trade Development Council, said thecouncil led a delegation of more than 70 Hong Kong enterprises at this year's expo, with recordsset in both the number of participating exhibitors and the amount of exhibition space used._____ Last updated: 2026-11-05 HKT 17:10 Edited by Tony Sabine

- Wong undermined HK's prosperity and stability: CE (2026-11-05 08:09)

Chief Executive John Lee on Thursday said Joshua Wong was one of the “primary culprits responsible for undermining Hong Kong’s prosperity and stability” after he was jailed for 10 years for conspiracy to collude with foreign countries or external elements to endanger national security. In a statement, Lee said Wong has repeatedly broken the law over the years, adding that before the implementation of the National Security Law (NSL) Wong, Nathan Law and others persistently colluded with foreign countries and tried to get them to impose sanctions against China and the SAR. Lee went on to say that after the NSL took effect, Wong, Law and their accomplices “showed no repentance and continued to act as agents of foreign countries and external forces, wantonly persisting in conspiring to collude with foreign countries or external forces to endanger national security, in a vain attempt to exert pressure on the Central Authorities and the HKSAR Government through external forces, betraying Hong Kong while remaining incorrigible". Meanwhile, a government spokesman said Wong's sentence " completely shattered the illusion of individuals endangering national security that they could escape liability under the guise of so-called 'international battlefront' or 'international advocacy', and demonstrated to the international community the HKSAR's firm determination to safeguard national security". - Road worker killed in Sha Tin vehicle collision (2026-11-05 05:05)

Police said a road maintenance worker died after being struck by a medium goods vehicle in Sha Tin on Thursday morning. The incident occurred at around 11am on Sha Tin Road near Pok Hong Estate. The vehicle was travelling towards Tai Po at the time. The female worker, who was about 60 years old, was found unconscious with head injuries and was pronounced dead at the scene. Edited by Tony Sabine

- Joshua Wong jailed 10 years for foreign collusion (2026-11-05 04:13)

Former activist Joshua Wong was on Thursday jailed for 10 years after pleading guilty to conspiracy to collude with foreign countries or external elements to endanger national security. High Court Judge William Tam found the offence was of a “grave nature” under the National Security Law. The court said Wong and his affiliates, including Nathan Law, persisted after the NSL took effect in calling for foreign sanctions, blockade or other hostile measures against the People's Republic of China, the Hong Kong SAR and their officials. They deliberately adapted roles so overseas allies made blatant calls for such sanctions, while Wong, remaining in Hong Kong, published and bolstered the calls. Judge Tam took a starting point of 13 years, then cut three years for the guilty plea and mitigation, leaving 10 years – the statutory minimum for a grave offence. Two months and two days of the new term will run concurrently with the sentence Wong is already serving for another subversion case. Speaking to reporters outside the High Court, Steve Li, Chief Superintendent of the police's National Security Department, said that Wong took part in social movements from a young age and committed various offences as an adult. Li said he hopes Wong will reflect on his wrongdoings. "I sincerely hope that for the rest of his time in prison, apart from reflecting on the wrongdoings he has done to the country and to the Hong Kong SAR, he must seize the opportunity to learn how to respect the law and properly understand his own country," he said. Edited by Aaron Tam

- HK 'is largest cross-boundary wealth management hub' (2026-11-05 03:59)

Financial Secretary Paul Chan on Thursday said Hong Kong’s wealth management sector is growing strongly and is well positioned to capture a fair share of business emanating from shifting global affluence. In a keynote speech at the Wealth Management Summit, he pointed to a survey in July by the Securities and Futures Commission that showed assets under management jumped 20 percent to more than HK$42 trillion. The city, Chan said, is now the largest cross-boundary wealth management centre in the world. A survey by summit organiser Private Wealth Management Association offered a similarly encouraging picture, as it found 77 percent of member firms reported stronger demand to open accounts or book client assets in Hong Kong and that 94 percent were moderately or highly optimistic about the city's prospects over the next five years. Chan said sentiment at this week’s Global Financial Leaders’ Investment Summit, which drew some 280 international leaders from the sector, including around 120 chairmen or chief executives, was "decidedly positive", with some planning to increase investment and headcount in the city. International capital was showing fresh confidence in Hong Kong, he said, with it being reinforced by policy measures to boost private wealth management. "Our tax concession for family-owned investment vehicles is now well

established and Hong Kong is home to over 3,300 single-family offices, up 25 percent in just twoyears," he said at the summit. "The New Capital Investment Entrant Scheme has received some4,300 applications, representing an expected investment of HK$150 billion, and we haveintroduced legislation to further enhance the preferential tax regimes for funds, single-familyoffices and carry interest, which we aim to pass by the end of this year." Chan said higher ratesand uncertainty were redrawing the map for capital flows, with cash earning a return again andinvestors diversifying across markets and currencies. Hong Kong is a clear beneficiary, he said,noting that deposits rose 7.7 percent to HK$20.9 trillion in the first nine months of this year.Initial public offerings raised, Chan pointed out, a record HK$388 billion and capital is arrivingfrom the United States and Europe, as well as the mainland, Southeast Asia, Central Asia andthe Middle East. He also pointed to technology and AI as a growing source of wealth: tech isnow the largest source of wealth among the world's richest tycoons, and mainland billionairefortunes rose over 20 percent to US$1.8 trillion last year. Hong Kong is capturing it at source –116 A- and H-share listings in the first three quarters accounted for about 70 percent of fundsraised, over half of which were in AI, semiconductors and robotics, with some 500 applicationsin the pipeline. Edited by Tony Sabine

- John Lee visits Shanghai to promote SAR businesses (2026-11-04 14:00)

Chief Executive John Lee arrived in Shanghai on Wednesday afternoon after visiting Beijing, where he attended the opening ceremony of the 29th Beijing Hong Kong Economic Cooperation Symposium. In a Facebook post, Lee thanked representatives from the Ministry of Commerce, Beijing's Liaison Office in the SAR, and the Shanghai Municipal People's Government, as well as colleagues from the Hong Kong Economic and Trade Office in Shanghai for meeting him at the airport. Lee will attend the opening ceremony of the ninth China International Import Expo (CIIE) on Thursday. "This year's CIIE has attracted participants from 162 countries, regions, and international organisations, with a total exhibition area exceeding 440,000 square metres," the post read. The CE will also attend the Hongqiao International Economic Forum. "There, I will highlight how Hong Kong is leveraging its unique strengths to integrate into and serve the nation's overall development, showcasing our achievements and opportunities." Lee said Shanghai and Hong Kong share deep historical ties, with the SAR pushing ahead plans to establish a "sister port" relationship with Shanghai within this year. He added that a pilot project for the mutual exchange of trade data was launched last month and is expected to benefit local small and medium-sized enterprises that export goods from the mainland. Lee is also expected to meet with Shanghai officials to deepen cooperation before returning to Hong Kong on Friday. Edited by Aaron Tam

- RTHK signs MoU with Tianjin Haihe Media Group (2026-11-04 13:00)

Radio Television Hong Kong (RTHK) has signed a Memorandum of Understanding (MoU) with Tianjin Haihe Media Group, in a bid to boost bilateral collaboration in areas such as talent exchange and events. The MoU was signed during a four-day trip by Director of Broadcasting Angelina Kwan to the mainland, which ended on Wednesday. During the trip, Kwan, as well as

participants of RTHK's national studies programme, called on the Hong Kong and Macao AffairsOffice of the State Council, and met Deputy Director Zhang Dongmei. Kwan also visited theNational Radio and Television Administration and the Beijing Radio and Television Station toexplore opportunities for strengthening exchange and co-operation. On Tuesday, Kwan signedan MoU with Tianjin Haihe Media Group President Ma Bo. The two sides agreed to establish aframework for bilateral collaboration spanning programme resources, talent exchanges,co-operation on platform and copyright licensing, as well as on-ground events. RTHK said thethe partnership will facilitate the distribution of its content to the Beijing-Tianjin-Hebei region,while enabling Tianjin Haihe Media Group's productions to reach international audiencesthrough RTHK's platforms. RTHK has signed MoUs with eight mainland and overseas mediaorganisations so far this year. "By building a growing network of broadcaster partnerships anddeepening collaboration on an ongoing basis, RTHK is giving concrete expression to its strategiccommitment to leveraging Hong Kong's unique role as a connector between the Chinesemainland and the wider world, thereby enhancing Hong Kong's international communicationcapacity and sharing the stories of the nation and Hong Kong on the global stage," a statementread. - ICAC charges former HKEX vice president (2026-11-04 08:21)

A former vice president of the Hong Kong Exchanges and Clearing (HKEX) was charged by the ICAC on Wednesday for allegedly obtaining dishonest access to the HKEX’s internal information system. The system contained confidential information involving listed companies, according to the anti-graft agency. Geoffrey Tong, 39, and his mother, Leung Yiu-chun, 68, jointly face one count of obtaining access to computer with a view to dishonest gain for himself or another under the Crimes Ordinance. The charge alleges that the two defendants obtained access to the HKEX’s internal information system with a view to dishonest gain between February 2018 and April 2023. The ICAC investigation revealed that Tong allegedly accessed confidential information of listed companies unrelated to his duties on multiple occasions. “Subsequently, the investment account of his mother, Leung, engaged in share transactions of the relevant listed companies, yielding profits exceeding HK$500,000,” the ICAC said in a statement. The case was brought to the Eastern Magistrates’ Courts for mention on Wednesday. The ICAC said it would not rule out further prosecution as the investigation continues. Edited by Edmond Fong

- 'Reservation effective in cutting Po Pin Chau visits' (2026-11-04 05:30)

Secretary for Environment and Ecology Tse Chin-wan on Wednesday said the government was reviewing the trial results of the real-name reservation system for the Po Pin Chau trail in Sai

Kung East Country Park. Speaking to lawmakers at the Legislative Council, Tse said authoritieswere looking at areas for further improvement and whether a fee could be imposed. Tse notedthat the reservation system had effectively controlled visitor numbers on peak days comparedto the past. He said the Po Pin Chau section received an average of 2,000 visitors per day duringthe Chinese New Year and Labour Day Golden Week holidays – before the reservation systemwas introduced, while the number was kept to around 950 during the National Day GoldenWeek with the reservation requirement. The highest visitor flow recorded at the Po Pin Chauviewing platform was also cut by more than 30 percent compared to the past, he added. “Visitors mainly arrived in the morning. As the reservation system effectively kept the numberof visitors within 500 per time slot, visitor flow on the trail was dispersed in an orderly manner,and visitors were able to tour in a more comfortable and safe environment withoutovercrowding,” he said. “Implementation experience shows that by effectively controlling thevisitor numbers and diverting visitor flow, the reservation system not only reduced the wearand tear caused by visitors to the natural environment but also significantly improved theoverall visitor experience.” He added that the reservation system operated well, with mostvisitors satisfied with the arrangement. The minister also said the government could collaboratewith the tourism sector to launch eco-tours to further develop ecotourism products. He saidpart of the 2,000 daily quota of Po Pin Chau trail could be reserved for tour groups. Edited byTony Sabine

- 'World unis to step up collaboration over NM' (2026-11-04 05:18)

Leaders from universities around the world attending a conference in Hong Kong on Wednesday said they believe the Northern Metropolis project will foster closer collaboration among institutions. On the sidelines of the World Class University Presidents Forum, Mark Scott, vice chancellor and president of the University of Sydney, recognised Hong Kong’s leading position in education, which has five institutions ranked in the world’s top 100 in the QS World University Rankings 2027. “There isn’t another city in the world that is achieving so remarkably at such scale, and so we have much to learn from Hong Kong,” he said. “One of the things I think we can learn is the commitment of leadership that sees investment in higher education, in research and in learning – as a key to economic growth and prosperity, and a richer and fairer society.” Scott also said the University of Sydney is very excited about what the mega project has to offer. “We are very impressed by the level of financial commitment and long-term engagement from government and leadership here, and we are keen to find a way to be productive partners.” Ebrahim Al Hajri, president of Khalifa University of Science and Technology in the United Arab Emirates, said the institution looks forward to playing a part in the development of the Northern Metropolis by collaborating with other institutions to “create local and global impact”. “This is actually physical research without borders – connecting both sides to technology, development, research, talent cultivation,” he said. “Not only that, but the translation of research into commercial opportunities to benefit society and economy at large.” The Worldwide Universities Network – a leading global higher education network that comprises of 23 research-intensive universities – said the hub represents a “significant

moment” for institutions to rethink global collaboration. “It’s not just about the scale andconcentration for Hong Kong,” its executive director Dawn Freshwater said. “It’s actuallyabout a beacon of excellence globally for ways in which we might partner, collaborate and trulyfocus on how we are going to solve the issues now facing civilisation – and that is substantial.” Fudan University president Jin Li, for his part, believes the Northern Metropolis can further helpHong Kong connect to the world. The mega hub is also crucial for the SAR to contribute to thenation’s development, he added. Edited by Edmond Fong

- CE calls for closer cooperation with nation's capital (2026-11-04 03:29)

Chief Executive John Lee on Wednesday called for closer financial and innovative ties with the city of Beijing, as he continued his visit to the capital. Speaking at a symposium on Beijing-Hong Kong cooperation, Lee said finance had been a key area for collaboration between the two cities over the years. He called for promoting two-way financial opening-up to facilitate economic transformation. “Hong Kong, as an international financial centre, connects mainland markets and global capital,” he said. “It acts as the most convenient international financing platform for enterprises in Beijing. “Through cross-border fund management, wealth management and a network connecting global investors, it serves enterprises’ needs for business expansion.” Lee said the two cities would continue to serve two-way financing for enterprises, and jointly expand green and sustainable finance, as well as offshore renminbi business. He also expressed hope of deepening innovative cooperation between the SAR and Beijing, as the nation developed new quality productive forces and promoted technological revolution and industrial transformation. The innovation sectors in the two cities would promote collaboration in life and health technology, artificial intelligence and robotics, he said. Lee added that Hong Kong would continue to assist mainland enterprises in going global. Edited by Tony Sabine

- Yau highlights benefits of RCEP accession for HK (2026-11-04 03:21)

Secretary for Commerce and Economic Development Algernon Yau said Hong Kong's entry into the Regional Comprehensive Economic Partnership could inject fresh impetus into advancing the Free Trade Area of the Asia-Pacific (FTAAP) agenda. "We welcome the establishment of the Accession Working Group for Hong Kong in September this year, and hope that our accession could inject fresh impetus into advancing the FTAAP agenda," he said during a virtual meeting at the 37th Asia-Pacific Economic Cooperation (Apec) Ministerial Meeting held on Tuesday. Yau said that enhancing economic integration has been the core objective of Apec, and that one of the directions is to continue to advance the FTAAP. He called on member economies to continue to strengthen connectivity in various areas, enabling the efficient flow of goods, services, capital and people, while narrowing development gaps and creating opportunities for all sectors across the region. Yau also stressed that the multilateral trading system must remain the foundation of regional integration and international trade, highlighting the importance of enhancing co-operation to deal with the seismic changes in the trade landscape. Edited by Edmond Fong

- HK offers businesses growth and capital: FS (2026-11-04 03:04)

Financial Secretary Paul Chan said Hong Kong is well-placed to provide businesses with both growth opportunities and long-term capital. The finance chief made his remarks on Wednesday during a conversation session with investors on the second day of the Global Financial Leaders' Investment Summit in Central. Chan noted that a company needs different forms of capital at each stage of development to turn its potential into sustained growth. This, he said, is exactly where Hong Kong comes into play. “Under the 'One Country, Two Systems' framework, Hong Kong is closely connected to the Chinese mainland, while a common law legal system, free flow of capital and international networks provide a trusted and familiar environment for global investors to take part in China's enormous growth,” Chan said. “Here, we already bring together venture capital, private equity, family offices and asset managers, with deep equity and bond markets. Our task is to connect them more closely across the corporate life cycle.” He said follow-on fundraising on the Hong Kong Stock Exchange reached HK$570 billion in the first nine months of the year, showing that the city’s market continues to support companies well beyond their initial listings. Chan also said the aim is to expand allocation choices to help investors manage risks and liquidity in support of long-term value creation. Hong Kong will keep raising its market efficiency with faster approvals, streamlined processes and clearer frameworks for new financial products – all without compromising its integrity, he added. Edited by Edmond Fong

- HK's dominance in QS rankings 'not by chance' (2026-11-04 03:00)

Acting chief executive Eric Chan on Wednesday said Hong Kong would continue to stay at the forefront of education amid the latest accolades for the city's univiersities. Speaking at the World Class University Presidents Forum, he noted that higher education had always served as a cornerstone for the SAR’s success. The city is a global hub for education and talent, Chan said, noting that five local institutions took half of top 10 places in the latest QS Asia University Rankings. Three of them ranked the top five. “This is not by chance. It is the result of sustained government investment, clear policy direction and the hard work of our universities,” he said. “It reflects our commitment to excellence, openness, academic freedom and institutional autonomy.” Hong Kong, Chan said, would keep expanding its horizon and align with the nation’s development to remain in its leading position. With the three university towns at the Northern Metropolis as well as the SAR’s Study in Hong Kong brand, he said the government welcomed people from the mainland and all over the world to pursue their studies here. “Hong Kong is a bridge between the mainland and the global higher education system. We are opening doors for our youth to engage with diverse cultures and cutting-edge ideas," Chan said. " By nurturing globally-minded innovators, we plant the seeds for a more collaborative and prosperous world.” Edited by Tony Sabine

- Software update triggers HK parking meter outage (2026-11-03 14:11)

The Transport Department said a software update triggered a citywide malfunction of Hong Kong’s parking meter system on Tuesday. The department said preliminary investigations found that a software update in the morning caused a back-end software fault, which prevented

the system from making a normal connection with the parking meters. It added that about11,000 parking meters were affected across the city. The department has instructed theoperator to conduct a thorough investigation into the cause of the outage and submit a detailedreport. There is no evidence that the system was attacked at the moment, the department said,adding it has reported the matter to the Digital Policy Office. The operator will arrange for fullrefunds for all meter transactions between 8am and 12.15pm to users, and will strive tocomplete the approval of the refunds within this week, it added. The Transport Departmentreceived a report at around 8.20am from the operator that the parking meter system hadmalfunctioned, with payment functions suspended or meter displays not operating normally.The system resumed normal operations at 12.15pm. Edited by Aaron Tam

- Evening News on TV32 - Nov 3 (2026-11-03 12:43)

Top stories for Tuesday, Nov 3, 2026 - Hong Kong's economy grows 5.2 percent in the third quarter. - Parking meters across the city go on the blink for hours. - Americans vote in midterms set to upend Donald Trump's presidency.

- HK recovery uneven despite high GDP: economist (2026-11-03 12:38)

A local economist said Hong Kong’s third-quarter GDP performance has lifted business sentiment, but the recovery remains uneven and will take time to broaden. Ho Lok-sang, adjunct professor with the Academy for Applied Policy Studies and Education Futures at the Education University of Hong Kong, made the assessment as advance estimates showed Hong Kong’s economy grew 5.2 percent year on year in the third quarter of 2026. The clearest sign of recovery, he said, was in prime office space. "Especially for the Grade A centrally located locations, [the] office take-up rate is pretty impressive," he said. "Now, certainly it’s recovering." But Ho stressed that the strength is not spreading beyond that segment. "On the outside of the Grade A and centrally located areas, office demand is still relatively weak, and the demand for commercial properties is still relatively weak," he said. He added that a broader recovery will not come quickly and will likely depend on lower rents. "I think that it will take quite some time to recover, and I think recovery will also necessitate a decline in rents," Ho said. Ho was more upbeat about the rest of the year's outlook. "Definitely the full year growth is going to be quite strong, and I am pretty confident that it will be over four percent or could be as much as 4.5 percent,” he said. The government's real GDP growth forecast for 2026 as a whole is 3.5 to 4.5 percent. Ho said the financial sector is performing "pretty well, extremely well", with IPOs still at a very high level and "no sign of it ebbing". He added that exports, too, are "doing quite well". But he flagged persistent weak spots: "Demand in terms of both construction demand and also the retail consumption demand and restaurant business are still lagging behind". To support these sectors, Ho pointed to major events and tourism. "Of course the major events – for example concerts and Halloween and so on – it’s entirely possible to boost tourism even more," he said. "Tourism is doing pretty well this year, and we hope that the tourists can stay a bit longer and consume a bit more." Ho said that outcome depends on the business sector and the government continuing to promote such major events. Meanwhile,

Kenny Shui, vice president of Our Hong Kong Foundation, said the third-quarter figures pointedto strengthening momentum: goods exports rose 30.4 percent on AI and electronics demand,while services exports grew 4.3 percent on tourism and financial activity. But he said privateconsumption rose just 2.8 percent, slower than the previous quarter, showing that the strengthin retail and investment has yet to fully reach households. "Growth momentum is broadening,but the recovery still needs to be felt more widely," Shui said. With first-nine-month growth at5.1 percent, Shui expects a fourth-quarter growth of four to five percent and full-year growth ofaround five percent – above the government's forecast, leaving room for an upward revision.He cautioned, however, that interest rates could weigh on business investment and householdspending, and with unemployment at 3.9 percent, consumption still needs job and incomesupport. In the fourth quarter, the key will be whether exports stay strong and consumptionand employment improve, Shui added. Edited by Aaron Tam

- HK takes five of top 10 in QS Asia university rankings (2026-11-03 12:26)

Hong Kong has dominated the QS Asia University Rankings 2027, with five of the city's institutions placing in the top 10. The University of Hong Kong (HKU) retained the top spot, while City University of Hong Kong (CityUHK) rose to fourth and the Chinese University of Hong Kong (CUHK) climbed to fifth. CityUHK and CUHK had tied for seventh a year earlier. The Hong Kong Polytechnic University (PolyU) and the Hong Kong University of Science and Technology (HKUST) shared ninth place. The rankings, compiled by international higher education experts at QS, assessed more than 1,700 universities across 26 higher education systems. Ben Sowter, QS' senior vice-president, said Hong Kong continues to set the benchmark for university performance in Asia. "The University of Hong Kong leads the region for a second consecutive year, and having five Hong Kong institutions in the top 10, more than any other higher education system, is an exceptional achievement," he said. "Increasing international engagement and growing recognition among academics and employers reinforce Hong Kong's regional strength, at a time when competition for students, researchers and academic talent is intensifying across Asia." Xiang Zhang, president and vice-chancellor of HKU, attributed the university's second straight top ranking in Asia to its community's unwavering commitment to academic excellence and its recent drive for change. "We will continue to draw the world's finest minds to shape an academic ecosystem driven by a spirit of inquiry, propelling Hong Kong's advancement as an international hub for education, innovation and technology, while supporting the nation's high-quality development through scientific breakthroughs and contributing to solving global challenges," he said in a statement. Meanwhile, CityUHK acting president Lee Chun-sing described the university's rise into the top five for the first time as an encouraging achievement. "This progress reflects the collective efforts of our academic community to pursue excellence in research and create an inspiring learning environment," Lee said in a statement. "It also demonstrates the success of our strategic commitment to recruiting global academic talent and nurturing future leaders." The top 10 also included three mainland institutions – among them Peking University and Tsinghua University – and two universities from Singapore. Edited by Aaron Tam

• Hong Kong economy grew 5.2pc in Q3 2026 (2026-11-03 09:13)

Hong Kong's economy grew 5.2 percent year on year in the third quarter of 2026, buoyed by stronger exports and domestic demand, according to advance estimates. The Census and Statistics Department said the increase compared with a 4.2 percent growth in the second quarter. On a seasonally adjusted basis, GDP rose 1.9 percent quarter on quarter. For the first nine months combined, the economy grew 5.1 percent – the fastest growth for the period in five years. Goods exports rose 30.4 percent in real terms, after 28.9 percent in the second quarter, while imports grew 29.9 percent. Exports of services increased 4.3 percent. Investment strengthened, with gross domestic fixed capital formation up 7.3 percent, while private consumption grew 2.8 percent and government consumption was up 1.7 percent. A government spokesman said the economy saw robust expansion, underpinned by accelerating exports and solid domestic demand. He said the outlook remained positive, citing global artificial intelligence investment, inbound tourism, cross-boundary traffic and financial market activity. But he advised caution over geopolitical tensions in the Middle East and tighter monetary policies by major central banks. Revised GDP figures and the updated forecast for 2026 will be released on November 13. Separately, retail sales rose 6.4 percent year on year in September to a provisional HK$33.4 billion – the 17th straight month of expansion. August's revised increase was 5.6 percent, and sales for the first nine months were up 8.3 percent by value. Online sales rose 12 percent to HK$4.4 billion in September, or 13.1 percent of total retail sales, and were up 21.2 percent for the first nine months. Retail sales volume rose 3.9 percent in September. The spokesman said solid local consumption sentiment, more visitor arrivals and earlier Mid-Autumn festive sales supported retail growth. He said upcoming mega events, festive celebrations and inbound tourism should add momentum, though external headwinds warranted close monitoring. Edited by Aaron Tam

• 'Joint task force to target bid-rigging early' (2026-11-03 08:48)

Secretary for Security Chris Tang on Tuesday said officers from an interdepartmental task force on combating bid-rigging in building maintenance and renovation projects would proactively look for clues to prevent such activities. Authorities have vowed to step up crackdowns on bid-rigging following the deadly Wang Fuk Court fire. Proposed measures included the criminalisation of bid-rigging in relation to these projects, enabling a dual-track approach of both criminal and civil enforcement. Authorities will also set up a joint task force that comprises officers from police, the ICAC and the Competition Commission to better coordinate law enforcement actions. Speaking to lawmakers at a meeting of the Legislative Council's Panel on Security and Panel on Economic Development, Tang said the task force's establishment could enable early intervention. Tang said officers would adopt different tactics against bid-rigging, such as surveillance, undercover operations and the use of informants. He added that the three agencies of the task force would also attend owners' corporation meetings to look for suspicious activities, including people who hold many proxy votes or suspected triad members engaging in harassment or intimidation. Officers would take enforcement actions when necessary, he added. "If we notice any abnormal situations at the scene that violate the law,

such as intimidation and blackmail, our law enforcement colleagues on site will take immediateaction," Tang said. "Even if the situation is not serious enough to require enforcement action,if we notice signs that may point to hidden crimes, we will carry out investigations." Tang saidthe task force would consider a series of factors when deciding which projects would beprioritised for investigation. "We will consider the impact of the projects, for example, projectsconducted at large estates with a lot of residents and those involving a large amount of money,and if someone seeking to participate in bid-rigging has triad backgrounds – these are all factorswe take into consideration." Secretary for Commerce and Economic Development AlgernonYau, meanwhile, told lawmakers that relevant legislative amendments to combat bid-riggingwould be submitted to the legislature as soon as possible. Edited by Aaron Tam

- HK eager to help build 'enterprises of tomorrow' (2026-11-03 08:10)

Hong Kong is ambitious about helping create the "enterprises of tomorrow", Financial Secretary Paul Chan said on Tuesday in amplifying the pivotal role the Northern Metropolis would play in realising this vision. That came as he told investors at the Global Financial Leaders' Investment Summit in Central about the dedication that investors can expect of Hong Kong to strengthening its contribution to innovation. "Our ambition is not only to finance businesses created elsewhere, but also to help create the enterprises of tomorrow," Chan said. "The Northern Metropolis is central to this effort. "It will bring universities, research facilities and technology enterprises closer together, linking education, technology and talent more closely with industry." The mega development project in the northern New Territories would, Chan said, serve as a base for closer ties with other Greater Bay Area cities, allowing Hong Kong to draw on their strengths in commercialisation, engineering and advanced manufacturing. Hong Kong was eager to pair promising businesses with capital and partners, as well as give investors trusted pathways into unfamiliar sectors and economies, he added. Hong Kong had, Chan pointed out, also taken steps to widen its connections with various economies and broaden asset classes in various regions. "In Southeast Asia, we are welcoming more enterprises from Indonesia, Thailand and Malaysia to lease in Hong Kong," he said. "In the Middle East, Hong Kong and Saudi Arabia have listed ETFs, tracking each other's markets, giving investors new routes to invest." "In Central Asia, Kazakhstan has already tapped Hong Kong's equity and bond markets. We welcome more issuers to raise capital here through listings and bond issuances." Chan added that Hong Kong would also continue to expand the range of assets and financial services to give investors more options to diversify. This, he said, included a central focus on developing a commodity and gold trading ecosystem. Edited by Tony Sabine

- Real estate recovery drives growth forecast higher: FS (2026-11-03 08:07)

Financial Secretary Paul Chan on Tuesday said all three drivers of economic growth performed well in the third quarter, with consumption, investment, and exports all recording growth to varying degrees. Hong Kong's advance estimates for the third-quarter GDP are set to be released later in the day. The financial chief had announced over the weekend that the city's

full-year economic growth forecast will be revised upwards following a stronger-than-expected5.1 percent GDP growth in the first half of the year. Chan said other factors also supported theprojection, noting that full-year visitor arrivals are likely to exceed the target of 50 million andthat the real estate market is improving. "The residential property market has been on the risesince the latter half of last year. Last year, the increase was approximately three percent, whilethe rise this year has been between seven and 10 percent. In the residential property market,it's fair to say we are moving into a stage of steady ascent." he said. "In commercial real estate,we have observed significant improvements in office rentals, in terms of rental prices andvacancy rates, particularly in central business districts. It has also stabilised in other districts."An expected influx of visitors towards the end of the year will also have a positive impact on theretail and catering sectors, Chan added. While certain industries, such as construction, catering,and retail, are facing more pressure with higher jobless rates, Chan stressed that the overallemployment situation is stable, with unemployment standing at around 3.9 percent. Inpredicting next year's economic growth, Chan stressed that government economists arecurrently assessing the impact of several key factors. These, he said, include expected highinterest rates, geopolitical uncertainties like fluctuating oil prices driven by Middle East wars,upcoming elections in major economies, and the reallocation of international funds. Edited byAaron Tam

- Financial institutions laud HK's gateway guardianship (2026-11-03 07:09)

Global bank leaders have lauded Hong Kong for its role as a gateway between the mainland and the rest of the world, facilitating two-way financial flows and minimising risks in an era of uncertainty. At a panel meeting held at the Global Financial Leaders' Investment Summit in Central, State Street chairman and chief executive Ronald O'Hanley noted that trade patterns had changed in recent years due to uncertainties brought by the pandemic and global conflicts. More borrowers and people looking to raise capital, he said, are looking for safer options when building supply chains and structuring financing – switching from "just in time to just in case". "Where we're seeing the most change is around the role of China, and Hong Kong is the gateway to that," O'Hanley said. "It's the kind of movement of money north and south and movement of capital north and south, and Hong Kong is playing that role." Barclays group chief executive C S Venkatakrishnan said firms had been reducing their dependency on strategic imports over the past decade and that the city which is positioned as both an international financial centre as well as a domestic one is the one that can help countries manage the dependencies. "I think in order for international finance not to get caught up in the strategic breakdown of dependence, it's important for the international financial centres like Hong Kong to do what you're doing – which is to have fair and transparent regulation to promote growth and to make it easy for people to operate," he said. BNP Paribas chairman Jean Lemierre noted that more mainland firms were operating in Europe. With Hong Kong being a renminbi hub, it acts as a bridge between China and Europe that helps these companies gain access to the euro, he said, adding that mainland firms can have better understanding of the European market through the SAR. • Beijing approves removal of Winnie Ho as housing chief (2026-11-03 05:17)

The State Council has decided to remove Winnie Ho from the post of housing secretary of the Hong Kong government, Xinhua reported on Tuesday. It said the decision, made on Tuesday, was in accordance with the Basic Law and based on the suggestion of Chief Executive John Lee. That came after Lee said Ho had tendered her resignation on October 28 and indicated that she would shoulder political accountability for the Wang Fuk Court fire in Tai Po. A day after that, the government made public the investigation report by an independent committee into the deadly blaze and unveiled sweeping measures to prevent a recurrence. In a statement, Lee recounted Ho's career from the time that she joined the government in 1992, becoming director of architectural services in 2020 to being appointed as secretary for housing in 2022. Lee said Ho had been dedicated to implementing his directives, including constructing some 30,000 Light Public Housing units, shortening the composite waiting time for subsidised rental housing from 6.1 years to 4.8 years, effectively combating the abuse of public rental housing and enacting the Basic Housing Units Ordinance to eradicate substandard subdivided units. "As she officially leaves her post today, I wish her all the best in her future endeavours and a healthy life," he said. Edited by Tony Sabine

• Parking meters restored after hours of breakdown (2026-11-03 04:47)

The Transport Department said the operation of the city's parking meter system had returned to normal following emergency repairs after a breakdown that lasted for nearly four hours on Tuesday morning. The department said it received a report from the operator at about 8.20am that the system had malfunctioned. The Digital Policy Office was notified of the incident, the department said, noting that there was no evidence to suggest the system had been hacked. Secretary for Transport and Logistics Mable Chan said officials had urged the operator of the parking meters to submit a report as soon as possible. "I want to reiterate that we attach huge importance to this incident and the system malfunction. I have instructed the Transport Department to require the system operator, Hong Kong Telecom, to submit a report as soon as possible. I hope an initial report can be submitted within the next 24 hours," she said. Edited by Tony Sabine

• New service to simplify mainland flight transit in HK (2026-11-03 04:36)

Secretary for Transport and Logistics Mable Chan on Tuesday said a new service had been launched to streamline international travel for mainland passengers departing from regional airports via Hong Kong International Airport to destinations around the world. A pilot phase is underway in collaboration with airports in Hangzhou and Wuhan. The new initiative is part of the national aviation programme named: "Trunk-Branch Connectivity, Whole-Network Linkage". Passengers can check in for their entire journey at their local airports, and fly out to international destinations via Hong Kong, instead of having to re-claim their luggage and then check in again in the SAR. Speaking at the opening ceremony of this year's Super Terminal Expo, Chan described the scheme as a game-changing service. "To put this into perspective, this transfer platform is already active across more than 260 airports in the mainland and has

accumulatively facilitated over 260 million transfer passengers, allowing tens of millions oftravellers to enjoy the unprecedented convenience of one-stop check-in and seamless baggagetransfers," she said. "This is far more than a commercial expansion. It is a policy breakthrough,which embeds Hong Kong directly into the national overall aviation architecture." Chan stressedthat Hong Kong International Airport plays a vital “linchpin role” to fulfil the SAR’s uniquemandate as a super-connector and a super value-adder that bridges the country and the world.Enhancing connectivity between the world’s second-largest economy and the rest of theworld, she said, also unlocks tremendous opportunities for trade and aviation. To facilitate thisgoal, Chan noted that Hong Kong had also set a target of expanding its global aviation networkfrom the existing 220 destinations to 240 under its recently unveiled five-year plan. Edited byTony Sabine

- HK blueprint 'gives investors the certainty they seek' (2026-11-03 04:12)

Hong Kong can offer certainty, clarity and confidence to global investors at a time when structural forces are rewriting the rules of global finance, Chief Executive John Lee said on Tuesday. He was speaking in Central at the Global Financial Leaders' Investment Summit, which gathered some 280 of the sector's leaders from around the world. While blockchain and tokenisation were rebuilding the world's financial infrastructure, and AI was reshaping productivity, labour markets and competition, Lee noted that Hong Kong’s first five-year blueprint had set out clear developmental directions. “The plan delivers what markets value most: certainty,” he said. “In an era of ever-shifting terrain, it lays out a transparent roadmap, showing where Hong Kong is heading and how we intend to get there. I invite you to consider that roadmap yours as well. “And to be clear, as we rethink the playbook, as we create strategic blueprints for Hong Kong's development, we ensure the value proposition of our city remains intact – that is our competitive edge under the ‘One Country, Two Systems’ principle.” Lee added that he would be attending the Apec Economic Leaders’ Meeting in Shenzhen this month with the goal of advancing regional economic cooperation. Meanwhile, Vice Premier He Lifeng said Hong Kong’s development had always been in sync with the nation, adding that ensuring the sound development of the SAR had been a key strategic consideration of the central government. Delivering a speech to summit through video, he urged the SAR to leverage its advantages under "One Country, Two Systems". "Further demonstrating its international characteristics, Hong Kong will continuously deepen and expand exchanges and cooperation with the world in areas such as the economy, technology, and culture," He said. "It will provide greater convenience and better opportunities for more international capital, institutions, and talent to come to Hong Kong for entrepreneurship and development. "We will, as always, fully support Hong Kong in maintaining its unique status and advantages over the long term, build a higher-level, more competitive free and open economic environment, and create broader space for future development." He also expressed the central government’s confidence in the SAR’s five-year blueprint to develop Hong Kong. Edited by Tony Sabine

- Parking meters down, emergency repairs under way (2026-11-03 02:31)

The Transport Department on Tuesday said that the parking meter system had broken down, with emergency repairs under way. The department said it received a report from the operator at about 8.20am that the system had malfunctioned. It said it instructed the operator to carry out the necessary repairs as soon as possible to minimise the impact on motorists, and to conduct a thorough investigation into the cause of the incident and submit a report. Motorists with enquiries can call the service hotline at 2332 3700. Later, Secretary for Transport and Logistics Mable Chan said several parking metres had returned to normal following the repairs. She added that no parking tickets would be issued until the system was fully restored. "The Transport Department immediately contacted the police. While the system is being repaired, police will not carry out enforcement on roadside parking spots. People can be sure of that," Chan said. "I want to reiterate that we attach huge importance to this incident and the system malfunction. I have instructed the Transport Department to require the system operator, Hong Kong Telecom, to submit a report as soon as possible. I hope an initial report can be submitted within the next 24 hours." _____ Last updated: 2026-11-03 HKT 12:17 Edited by Tony Sabine

- Man arrested over suspected spiked drink (2026-11-03 01:29)

Police have arrested a 61-year-old man suspected of adding an unknown substance to a 33-year-old woman's drink at a bar in Tsim Sha Tsui. Police received a report just before 5am on Sunday that a woman had fallen ill after drinking a beverage at a bar on Mody Road, with suspicions that the drink had been spiked. She was conscious and taken to Queen Elizabeth Hospital for treatment. The Yau Tsim Criminal Investigation Support Team took up the case and made the arrest in Central on Monday. The man is being held for further questioning on suspicion of administering poison with intent to harm. Japanese former adult film star turned DJ, Mao Hamasaki, has said she fell ill after having a drink that she said had been tampered with during a Halloween event. Edited by Tony Sabine

- Driver arrested over Tuen Mun fatal accident (2026-11-03 01:26)

A 54-year-old woman died early on Tuesday after reportedly being knocked down by a private car in Tuen Mun, with the driver arrested on suspicion of dangerous driving causing death. The accident happened at about 11.09pm on Monday along Castle Peak Road in Hung Shui Kiu, as the car was travelling towards Yuen Long. The woman suffered serious head injuries and was rushed to Tuen Mun Hospital in an unconscious state, where she was certified dead at 0.17am on Tuesday. The 53-year-old male driver was arrested and is being detained for further enquiries. The case is being investigated by the Special Investigation Team of Traffic, New Territories North. Edited by Tony Sabine

- Three-vehicle crash in Tsuen Wan injures nine (2026-11-02 14:18)

Nine people sustained light injuries in a car crash involving three vehicles in Tsuen Wan on Monday night. Police said they were alerted at 7.30pm that a minibus collided with a private vehicle and a light goods vehicle on Tsuen Wan Road. The collision shattered the minibus'

windshield. All of those hurt were conscious. A part of Tsuen Wan Road was temporarily closeddue to the incident. Edited by Aaron Tam

• Foreign firms debut in HK to access mainland market (2026-11-02 14:04)

A number of foreign companies have made their debut at the annual Hong Kong Fintech Week and StartmeupHK that commenced on Monday, hoping to use the SAR as a springboard to tap into the mainland market. They include a Canadian company that produces renewable fuels. Jag Singh from SBI BioEnergy noted that his firm can contribute to the SAR's green aviation development, and hopes to also explore opportunities in the mainland market. "Everyone in the world has a shortage of sustainable aviation fuel and a target to blend sustainable aviation fuel," he said. "So we are helping to achieve that and we can do it globally because it's our own process modular, and we have all the control of the technology because we have the hydrogen production as well as the conversion system in them." Singh went on to say that the firm's next goal is to expand even further in Asia through Hong Kong. "We hear a lot about the great agreements and structures here and IP protection, and that's very important to us because these are our babies – these are our patented processes – we spent a lot of time and blood, sweat and tears to make this happen," he said. "So I think it's a perfect gateway or potential base as a springboard to the rest of Asia and China." Canadian firm Deep Sky, which specialises in carbon removal, is also taking part in the event. "What I've noticed is there's an incredible density of companies that are developing energy infrastructure in [the] mainland and internationally, financiers financing those projects and trading firms who are trading the products," the firm's Charlie Renzoni said. "So I see an incredibly important connection between Hong Kong, [the] mainland and the rest of the world." For Korean firm MoneyStation, which focuses on AI-powered investment intelligence, they decided to make the SAR their first stop to go overseas. "Hong Kong is like a pioneer in adapting the new financial business models like cryptos or stock markets and asset management," its founder James Lee said. He added that the city's annual event also offered them a chance to look for strategic business partners. Edited by Aaron Tam

• 'HK crucial for mainland firms' global expansion' (2026-11-02 13:17)

Mainland companies have hailed the city's annual flagship finance and technology event, saying it offers an opportunity for them to carry out exchanges with potential overseas partners. Speaking on the sidelines of the Hong Kong Fintech Week and StartmeupHK on Monday, Liu Yong from the Zhongguancun Fintech Industry Development said this year was their third time participating in the event. He said that the SAR's role as a super connector was crucial for the mainland in setting up shop overseas. "Hong Kong can fully leverage its strength in international talent. Because in the international aspects, such as accounting standards, Hong Kong itself is an international financial centre – it has a very good foundation and conditions," he said. Mu Rong from the Greater Bay Area fintech delegation noted that some firms focusing on securities and asset management, which used to adopt a wait-and-see approach, have gradually set up shop in Hong Kong to start doing business overseas. "Some of these tech

companies have started making profits. The orders that they received from overseas customerswere even larger than those from the mainland,” she said. “This shows that Hong Kong fullyrecognised their technical capabilities.” Mu went on to say that firms that wish to expand tointernational markets will now team up, rather than go it alone. Wang Yu, who represented adelegation led by the Union of Finance Alumni of Peking University said that more than 30percent of the firms in their group – particularly those focusing on AI – are determined toexpand globally via the SAR. Wang highlighted how Hong Kong’s convenience across variousaspects, including culture and language, makes it an ideal platform to go global. Edited by AaronTam

- Apple iPhone pre-sales linked to 1,700 fraud cases (2026-11-02 10:35)

Police have received more than 1,700 reports of suspected credit-card fraud cases linked to Apple's recent iPhone pre-sales in September and October. At a Southern District Council meeting on Monday, Police Commissioner Joe Chow said the force received 1,589 reports of unauthorised credit card transactions involving the purchases of various Apple iPhone 18 models. Pre-orders for the smartphone began on September 12 in Hong Kong. Another 138 reports were filed in October, when the iPhone Duo began accepting orders. According to Chow, Apple opted against extra security measures for credit card transactions. An example would be the "3D Secure" protocol, which asks customers to enter a one-time password or verify their identity on the bank's mobile app. "During this period, we contacted Apple, credit card companies and banks, and cancelled all problematic purchase records. As a result, the victims did not suffer any losses," Chow said. The police chief said officers had reached out to Apple on multiple occasions to express hope that the company would implement effective security measures and strengthen verification in future product launches. Chow also briefed district councillors on Hong Kong's law-and-order situation. He said fraud remained the dominant crime category, with 34,679 cases in the first nine months of the year, making up 51 percent of all crimes. Victims reported losses of HK$6.02 billion, a 6.7 per cent increase year on year. Phone scams were now the most common type of fraud, followed by online shopping deception. Edited by Raymond Yeung

- Govt pledges 'one-stop liaison service' for homeowners (2026-11-02 09:25)

Deputy Financial Secretary Michael Wong on Monday said liaison officers would be assigned to handle homeowners' enquiries and complaints regarding future building renovation projects. The government announced last week comprehensive reforms to the building maintenance industry to prevent a repeat of the Wang Fuk Court fire that killed 168 people last year. A report

detailing the shortcomings by contractors and government departments in relation to thetragedy was released on the same day. Among the measures proposed by the government, theHousing Bureau's Independent Checking Unit (ICU) would be decommissioned and replaced bya Public Housing Building Control Section this month. Project-specific teams would be set up toassist housing estates undertaking major maintenance and renovation works. A liaison officerwould act as the point of contact for the owners' corporation and homeowners. Wong, whoattended a Legislative Council housing panel meeting as Acting Secretary for Housing, said theliaison officers will keep homeowners informed of developments. "Currently, the ICU hasdifferent professional functions. It may not be practical for homeowners to find the person incharge of each field," he said. "We have internal referrals now, but it's neither direct nor fastenough. In the future, the one-stop liaison officer would handle all these issues, as well ascomplaints concerning maintenance matters." Wong added that authorities also planned to useartificial intelligence to speed things up, such as auditing and analysing documents. " It'simpractical for one person to go through 1,000 documents, while artificial intelligence can finishthat in 0.1 seconds," he said. "It will flag anomalies and anything improper, but will not makethe final judgment. We will always have people to make the judgment." Wong said any potentialissue flagged by AI will be followed up manually. Edited by Raymond Yeung

- 30pc of financial firms now employ agentic AI: survey (2026-11-02 08:05)

The Securities and Futures Commission has released its first-ever AI readiness survey, showing that most large financial firms in Hong Kong already use artificial intelligence across their operations, with adoption expected to accelerate over the coming year. The survey, conducted between July and August this year, covered 20 large financial firms with 78 affiliated licensed corporations in Hong Kong. Together they accounted for over 75 per cent of securities transactions reported by licensed corporations in the six months ended June. The survey found that 95 per cent of surveyed firms expected AI usage to accelerate over the next 12 months, with 90 per cent already connecting AI tools to internal systems. AI use now spans front-, middle- and back-office activities. "AI adoption in Hong Kong in the capital market is growing rapidly in speed and in scale," SFC chief executive officer Julia Leung said during the Hong Kong Fintech Week. Notably, agentic AI – which can autonomously determine and execute steps to achieve an objective – is gaining traction, the survey showed. Thirty per cent of surveyed firms already use it in their business operations, and 25 per cent are piloting it with varying degrees of autonomy and human involvement. However, Leung struck a note of caution. "Just think of agentic AI [as] your kids at home. They define the boundaries we set for them. They can go rogue, they can collude with their siblings, and disrupt your neighbour," she said. Leung also acknowledged that the development of frontier AI models and agents has outpaced governments' and regulators' ability to set rules. The SFC said the findings will inform its supervisory approach to AI, with priorities including protecting investors, strengthening cybersecurity and operational resilience, and ensuring effective AI governance. Edited by Raymond Yeung

- HSBC to set up AI institute in race to train staff (2026-11-02 06:21)

Banking giant HSBC says an artificial intelligence and emerging technology institute being set up in Hong Kong is due to become operational in the first quarter of 2027. Announcing the update at Hong Kong Fintech Week on Monday, chief executive Georges Elhedery said the city's biggest lender aims to move the institute to the Northern Metropolis once a suitable location has been identified. For now, he said the Hong Kong University of Science and Technology will be the institute's first anchor academic partner. "We bring their skills and know-how and capabilities as well as our domain expertise and financial services to find and work on solutions that make our clients' lives much easier in the age of AI, but also other emerging technologies such as blockchain, quantum, etc," Elhedery said. He framed the institute's establishment as part of HSBC's broader AI strategy to give its roughly 200,000 employees – including about 28,000 in Hong Kong – an efficiency boost. "AI is going to be disruptive. It's going to transform jobs. It's going to eliminate some. It's going to create new ones," Elhedery said. "The first mission for us is to bring all our colleagues … on the journey with us as opposed to creating an environment where uncertainty actually prevails." HSBC is already testing how client agents could interact with the bank's agents to handle basic tasks, he said, though security remains a major workstream. On AI security, Elhedery said, HSBC is constantly working to identify vulnerabilities and build more resilient systems. Edited by Raymond Yeung

- HKMA eyes next level for Fintech 2030 with AI push (2026-11-02 04:14)

The Hong Kong Monetary Authority has set out the next phase of its Fintech 2030 strategy, which will pair new technology initiatives with a renewed emphasis on governance and risk management. Speaking at Hong Kong Fintech Week on Monday, authority chief executive Eddie Yue said the HKMA is launching Project Sage to examine the application and governance of " agentic finance" – artificial intelligence systems that can execute tasks on behalf of users. "The main purpose of the Sage project is to hope that, under agentic finance, we can both promote application and pay attention to governance," he said. Yue said a cross-sector expert panel would bring together finance, payments, professional services, technology and academic representatives to explore use cases, sandbox testing, interoperability standards and governance safeguards. The HKMA is also issuing a discussion paper on banks' use of agentic AI, seeking views on governance models, responsibility arrangements and a possible central register of trusted agents. Yue said the aim is to set rules that allow innovation while managing risks. He also said the authority would launch a post-quantum cryptography toolbox with the Hong Kong University of Science and Technology to help banks prepare for the challenges stemming from breakthroughs in quantum computing. On tokenisation, Yue said the HKMA is introducing tokenised central bank money to enable 24/7 settlement of interbank tokenised deposits and would expand the number of participating banks to support cross-lender transfers around the clock. "The benefit is that, for example, quite a number of enterprises with global liquidity to manage can, if round-the-clock tokenised deposit transfers are achieved, make payments at any time and anywhere, across different accounts and even cross-border," he said. " And for retail investors, if in the future they want to invest in different retail tokenised financial products, they can also more flexibly do their investments 24/7, strengthening the flexibility and

security of their asset allocation." Yue said the HKMA would further pilot tokenised ExchangeFund Bills in the secondary market and explore whether regulated stablecoins could serve as apayment channel. He stressed that innovation must be matched by governance and riskmanagement so it can go further, land better and benefit more people. Edited by Tony Sabine

- HK 'an ideal home for international private law body' (2026-11-02 03:54)

Chief Executive John Lee on Monday said Hong Kong strives to attract global organisations and promote international legal cooperation. He made the remarks in an opening ceremony by the International Institute for the Unification of Private Law – also known as Institut International Pour L'unification du Droit Prive (Unidroit) – of its Asia-Pacific liaison office in the city. At the ceremony, which also marks the beginning of this year’s Hong Kong Legal Week, Lee said the establishment of the office would deepen collaboration, facilitating the implementation of private law. "It is a decision of profound significance – for Unidroit, for Hong Kong and for the entire Asia-Pacific region," he said. "The liaison office will serve as a focal point for enhanced engagement with member states and stakeholders in the region. And it will play a crucial role in the legislative and institutional work of Unidroit. "Hong Kong, strategically located at the heart of Asia, is an ideal home for the Asia-Pacific liaison office." Lee said the establishment of the liaison office would strengthen the collaborative relationship between Hong Kong and the institute. The office would also be able to benefit from cooperation with other legal organisations in the city, he added. Hong Kong, Lee pointed out, is a renowned international legal, trade and financial hub and serves as a host to many international organisations. The city’s laws and dispute resolution framework also align with international standards and have been recognised globally, he stressed. The nation's 15th Five-Year Plan supports Hong Kong’s development as an international legal and dispute resolution services centre, Lee said, while the city’s own five-year blueprint sets out a series of measures for leveraging the strengths of the SAR’s common law system. Edited by Tony Sabine

- John Lee says HK offers businesses long-term certainty (2026-11-02 03:11)

Chief Executive John Lee said Hong Kong offers businesses the "certainty" they need to innovate, invest and flourish over the long term, even as global uncertainty persists. That assurance came in opening remarks that he made on the first day of the region's annual flagship finance and technology event, Hong Kong Fintech Week and StartmeupHK, on Monday. The conference brings together some 1,000 government leaders and fintech, finance and technology professionals from more than 100 countries and economies, along with around 800 exhibitors and startups and more than 30 delegations from the mainland and abroad. Lee framed the event against a fast-changing global backdrop, saying technology is advancing at a remarkable speed, with artificial intelligence transforming industries and forcing businesses worldwide to adjust to shifting market conditions and unprecedented technological changes. "In such an ever-changing, all-encompassing environment, one quality is becoming even more valuable — I'm talking about certainty," he said. "Certainty about direction, certainty about

opportunities, certainty about where businesses can invest, innovate and flourish in the longterm." Lee pointed to Hong Kong’s first-ever five-year plan, saying the strategic blueprintreinforces the city’s status as an international financial, maritime and trade centre andaviation hub, while accelerating its development as an international innovation and technologycentre and a hub for high-calibre talent. He also cited Hong Kong’s ranking as the world’sfreest economy, its more than 1,400 fintech companies and InvestHK’s support for more than550 overseas and mainland companies in the first nine months of the year, generating aboutUS$9 billion in foreign direct investment and some 11,100 jobs. He also pointed to the NorthernMetropolis as a long-term source of opportunity, saying the mega project would create aninnovation "through-train" that connects talent and research with commercialisation, capitaland global markets. Lee expressed confidence that Hong Kong’s future would be one foreveryone – in business, finance, technology and beyond. "If you believe that technology willdefine the future, if you believe that Asia will continue to drive global economic growth, and ifyou believe in the transformation taking place across China, then you must believe in HongKong's pivotal place in making it happen," he said. "After all, it's in Hong Kong that you accessglobal capital while remaining close to one of the world's most dynamic engines of innovationand growth." He added that Hong Kong is a place where ideas can move from research tocommercialisation and then into global markets – an East-meets-West city built onmultilateralism, free trade and mutual opportunity. Edited by Tony Sabine

- ICAC charges two ex-cleaning firm executives (2026-11-02 03:04)

Two former senior executives of a cleaning company have been charged by the ICAC for allegedly accepting bribes totalling more than HK$75 million in connection with the procurement of cleaning vehicles and maintenance services, with the case expected to be mentioned at Kwun Tong Magistrates' Courts on Monday. William Fung, 54, former director of Johnson Cleaning Services Company Limited and chief executive officer of its parent company, and Jimmy Lee, 57, former general manager of Johnson, were both charged on October 30 with one count of conspiracy for an agent to accept advantages under the Prevention of Bribery Ordinance and the Crimes Ordinance. At the time of the alleged offences, Fung oversaw Johnson's business including subcontracts, purchase orders and the release of payments. Lee was under his direct supervision. Between November 2024 and January 2026, Johnson procured multiple fleets of cleaning vehicles from a supplier and regularly used the supplier's vehicle maintenance services, with total expenses exceeding HK$160 million. The charge alleges that Fung and Lee conspired to accept bribes totalling over HK$75 million from individuals including the supplier's proprietor, as a reward for showing favour to the supplier in the company's business dealings. The ICAC said Johnson had rendered full assistance during its investigation. As the corruption investigation is ongoing, the commission said it would not rule out further prosecution. Edited by Tony Sabine

- Evening News on TV32 - Nov 1 (2026-11-01 12:22)

Top stories for Sunday, Nov 1, 2026 - The justice secretary says "bad actors" are going to be driven out of the building maintenance sector. - Thousands join the first ever Northern Metropolis Marathon. - Hong Kong has its warmest October on record.

- Hong Kong records warmest October since records begin (2026-11-01 10:27)

The Observatory on Sunday said Hong Kong recorded its warmest October since records began in 1884. The forecaster said the average temperature last month stood at 27.6 degrees Celsius. The mean maximum and minimum temperatures also set records, at 30.5 degrees and 25.8 degrees respectively. The Observatory attributed the unusually warm conditions to the ongoing El Niño and a weak northeast monsoon, while noting that climate change also played a role. A fresh to strong northeast monsoon is expected to reach the city in the coming days, bringing a slight drop in temperatures early next week. Edited by Aaron Tam

- Bar Association backs criminalising bid-rigging (2026-11-01 09:45)

The Bar Association on Sunday said it supports the criminalisation of bid-rigging activities through amendments to the Competition Ordinance. This came as its task force on law review proposed about 50 legislative amendments following the deadly Wang Fuk Court fire. It covered bid-rigging, tender specifications, declaration of interests, as well as project safety and risks. Jose-Antonio Maurellet, chairman of the association, expressed support of criminalising bid-rigging in parallel to the existing civil regime. “The existence of the dual-track system, of course, does not mean that civil and criminal proceedings would be taken forward at the same time for the same case – this would contravene the principle against double jeopardy,” he said. “The enforcement authorities concerned will therefore need to coordinate with one another and to decide whether a case is to be dealt with by civil enforcement or by criminal prosecution.” He went on to say that under the new criminal offence, the elements of crime, such as the definition of bid-rigging and the burden of proof, must be clearly defined. The association also proposed to amend the Building Management Ordinance, saying if a project exceeds a certain value, tenders must be submitted in “two envelopes” – one for the technical proposal and the other for price. The price proposal may only be opened after the technical proposal has met a minimum score specified in the evaluation to encourage a focus on quality, it said. Edited by Aaron Tam

- Lan Kwai Fong welcomes record 105k Halloween revellers (2026-11-01 09:35)

Lan Kwai Fong Group on Sunday said it welcomed a record 105,000 revellers on Halloween, up from 80,000 a year earlier, as bars and restaurants saw business nearly double. The group's chairman, Allan Zeman said the size of the crowd on Saturday – also the final day of Hong Kong's inaugural month-long programme for the spooky festival – was the busiest Halloween the entertainment district had ever seen. "The first Saturday that it came out, it was busy, the second Saturday, more people came, and then the third Saturday was really quite busy but not as busy as last Saturday night," he said. “It was a record because last year we had 80,000 people and never expected to break the record.” He lauded the Tourism Board’s Halloween

Month, saying it was a draw for visitors from across Hong Kong, the mainland and overseas. " The beauty was there was people from all over," Zeman said. Locals made up roughly 50 to 60percent of the crowd and mainland visitors stood at about 20 to 30 percent, with Zeman sayingthere were more tourists from around the world as well. "In the past we never had so manyinternational people," he said, adding that visitors told him they had come from Canada and theUnited States specifically to experience Lan Kwai Fong. Zeman also said bars and restaurantsdid 90 to 100 percent more business than on a normal Saturday, while other businessesreported gains of 40 to 50 percent. "It was just the best Halloween that Lan Kwai Fong has everseen," he said. The Lan Kwai Fong Group chairman also said the opening of the round-the-clockHuanggang Port and extended clearance hours at Shenzhen Bay control point made adifference. It’s a "game changer for Hong Kong – not just for Halloween", he said, citing facialrecognition that can clear travellers in about two minutes. Edited by Aaron Tam

- HK Q3 growth set to beat forecasts: FS (2026-11-01 08:18)

Hong Kong’s economy is expected to grow faster than market forecasts in Q3, extending its positive growth streak to 15 consecutive quarters, according to Financial Secretary Paul Chan. In his weekly blog on Sunday, Chan said the government will release advance estimates for third-quarter GDP on Tuesday. Preliminary indications suggest that faster export growth and solid domestic demand will push year-on-year growth above market expectations and accelerate from the second quarter. "For the first three quarters combined, real GDP growth year-on-year will be the highest for the same period in five years," he said. "With the economy maintaining good momentum, the full-year economic growth forecast is expected to be revised upward again." Chan attributed part of the growth to technological innovation, noting that the global artificial intelligence investment boom continues to drive strong demand for high-end electronic components and AI-related goods. "The value of Hong Kong’s merchandise exports surged by 64.9 percent year-on-year in September, recording double-digit growth for the 20th consecutive month, with the monthly increase hitting a more than 40-year high," he said. " Among these, exports of 'office machines and automatic data processing machines' soared by 183.7 percent." Private investment expenditure has also grown by double digits for three straight quarters and maintained that momentum into the third quarter, Chan said, reflecting corporate confidence in the outlook. Service exports have benefited from continued growth in inbound tourism, buoyant cross-boundary transport and an active financial market. Chan said upcoming retail and catering receipts figures are expected to continue showing moderate growth. He also noted that two major international financial events – Hong Kong Fintech Week and the Global Financial Leaders’ Investment Summit – will begin on Monday. Fintech industry players and investors from more than 100 economies, as well as heads of top international financial institutions, will gather in Hong Kong to discuss key issues in global financial markets and technological development and to identify and create new investment opportunities through high-level exchanges. - Runners unfazed by heat in first-ever NM marathon (2026-11-01 08:06)

Around 15,000 people took part in the inaugural Northern Metropolis Marathon on Sunday morning, with the organiser saying it will try to hold future races in cooler months and extend the route to Shenzhen. At the sound of the horn, eager runners began their 42.1km journey at 6:30am in Shek Mun, where the Heung Yee Kuk – which organised the event – is headquartered. Full marathoners then headed north via the Science Park, Tolo Highway, Lam Tsuen River in Tai Po and the Lung Shan Tunnel before crossing the line at the recently commissioned Fanling Bypass. Half-marathon runners had a similar route, starting at the Science Park and finishing in Fanling. Most participants said the arrangements were smooth. But depending on their luck, some might have had to briefly stop at the traffic lights at a crossing to let cars pass. A certain section of the route also saw runners sharing a bike path with cyclists. Lai, a marathon finisher, said he was not pleased with his time of three hours and 11 minutes. "I kind of expected it, because of the heat," he said. "To me the route didn't matter. Running in 28 degrees [Celsius] was really tough, and there was a lack of water stations. There should be one station every 2.5 kilometres, compared to every three to four kilometres right now." Former SAR representative Chan Ka-ho, meanwhile, came fourth overall in the men's marathon. "There aren't that many full marathon courses in Hong Kong, perhaps only three or four. So this new course offers a fresh experience," he said. "If you ask me if the route is fast, I would say no. But for recreational runners who wish to step onto the Fanling Bypass and Lung Shan Tunnel, then it's quite nice." To promote local produce and delicacies, each finisher was given a hydroponic cabbage as well as pastries. Heung Yee Kuk chairman Kenneth Lau said he was surprised by the turnout. He hoped that the route allowed participants to experience the charm of the New Territories, and thanked authorities for providing help to overcome various challenges. "Many people have asked, if they can run all the way to Shenzhen... We can see that infrastructure development in Yuen Long and the rest of the Northern Metropolis is in full swing, with numerous construction sites and projects under way," he said. "I believe that in the future, the route will surely extend to San Tin, the Lok Ma Chau Loop, or even all the way into the Shenzhen area." Lau admitted the day's temperature of 25 degrees Celsius or so was not the most ideal for running, and hoped to hold future races in December if possible. Edited by Aaron Tam

- 'Revolutionary change aimed for building maintenance' (2026-11-01 05:15)

Secretary for Justice Paul Lam on Sunday said the government’s efforts to amend the law following the deadly Wang Fuk Court inferno aim to make a "revolutionary change" to the entire building maintenance ecosystem in Hong Kong. His remarks came as authorities plan to submit legislative amendments to the Legislative Council within this year to reform the building maintenance and renovation system, as well as combat bid-rigging activities. Speaking on a Commercial Radio programme, Lam said dishonest contractors should be driven out of the market. “In today’s large-scale building maintenance, there is an objective fact – an unfortunate and unacceptable fact – that the 'fat of the meat' is too rich, and the market was almost monopolised by bad actors,” he said. "A friend of mine in law enforcement put it very well: bad money drives out good. Genuinely decent maintenance workers and professionals were not willing to take part in the market. People have no choice – it’s all bad actors. "So the

first step is to drive the bad actors out of the market, so that the highly professional and honestpeople will be willing to re-enter the market." Lam said authorities should also assist homeowners in finding suitable contractors and professionals, and ensure that construction worksare carried out in a safe and lawful manner. Speaking on the same show, Secretary forCommerce and Economic Development Algernon Yau said bid-rigging involves complex issuesincluding price-fixing and market sharing. He believes criminalising such activities would enablegreater powers to combat bid-rigging, expressing hope that the amendments could be passedby April next year. Edited by Tony Sabine

• Evening News on TV32 - Oct 31 (2026-10-31 12:47)

Top stories for Saturday, Oct 31, 2026 - Finance chief Paul Chan says Hong Kong could record its strongest full-year economic growth in five years. - Police arrest 58 people, including minors, in an anti-triad operation. - Halloween celebrations are in full swing, here and around the world.

• Vaccination calls as flu season 'not over' (2026-10-31 10:30)

A seven-year-old girl with an underlying illness is critically ill with influenza A as authorities urge vaccination. The girl developed a runny nose, diarrhoea and abdominal pain on Thursday, followed by fever and convulsions on Friday, according to the Department of Health. She was admitted to Tuen Mun Hospital. She was transferred to the hospital’s paediatric intensive care unit after her condition deteriorated and remains there for further treatment. Health authorities warn that the city’s flu season is not over. Hong Kong's current flu season has already dragged on for four months after beginning in late June, according to health officials. Dr. Edwin Tsui, Controller of the Centre for Health Protection, noted that while the latest surveillance data shows signs of decline, overall influenza activity "remained above the baseline level." "A cumulative total of 28 cases of severe paediatric influenza infection have been recorded in the current influenza season. Among these cases, 20 patients have recovered and been discharged from hospital, two are in stable condition, four are in critical condition and two have passed away," Tsui said. The CHP has urged residents to get vaccinated to reduce the risk of potential illness. Its analysis of the previous year’s data showed that unvaccinated children who contracted flu had approximately five times the rate of severe complications or death compared with vaccinated children. • 58 arrested in triad crackdown as youth crimes spike (2026-10-31 09:28)

Police on Saturday arrested 58 people in a city-wide, anti-triad operation, disrupting gang networks exploiting the youth. The suspects rounded up include core gang members as well as those aged below 18. They are alleged to have committed a series of offenses, including claiming to be triad members, inviting another person to become a triad member, false imprisonment and money laundering. Chief inspector Chan Pak-ki said the arrests came after undercover officers infiltrated two triad groups amid a rise in youth crimes early this year. “We found that these triad groups would obtain the youths' trust first. They might carry out simple initiation ceremonies," she said. "After obtaining their trust, they lured them, through false

promises that there was quick money to be made, into carrying out a lot of illegal acts." Theforce also busted a number of illegal gambling and drug dens. Chan did not rule out furtherarrests, adding that the operation was still ongoing. Edited by Azam Khan

- Lan Kwai Fong expects monster finish to Halloween (2026-10-31 08:38)

Hong Kong's premier nightlife and party district Lan Kwai Fong is expecting business to jump about 50 percent this Halloween. Turnover is already up at least 30 to 40 percent over the past two weekends, according to Anthea Cheung, Lan Kwai Fong Association director. She credited this growth to the Tourism Board's inaugural Hong Kong Halloween Month, which generated significant festive buzz ahead of this weekend's finale and attracted higher-than-expected interest. Cheung said locals still made up around 70 percent of visitors to the district around which Halloween celebrations traditionally centre, with the rest coming from overseas and the mainland. The number of arrivals from the Greater Bay Area have spiked with cross-boundary travel made easier, she added, with many of them dressing up for a night out. Bars and restaurants, she pointed out, have kept some seats in reserve for walk-in customers since bookings for tables are already full. "We expect about a 50 percent increase tonight – it's Halloween proper, and it's a weekend too," Cheung said. "Our merchants are ready, they've stocked enough drinks and food for tonight's celebrations." Looking ahead, the association wants more hotel, dining and transport package deals to draw visitors into staying longer and spending more. As Lan Kwai Fong gears up to cope with crowds of revellers, immigration officers inspected Huanggang Port and Shenzhen Bay Control Point ahead of an expected late-night outbound peak on Saturday and Sunday by mainlanders here for Halloween night. The Immigration Department urged travellers seeking a quicker crossing to avoid peak hours where possible, adding that it is coordinating with public transport operators to step up their service frequency. - More experts 'applying to join building-repairs lists' (2026-10-31 07:33)

Secretary for Development Bernadette Linn said government has received an encouraging response from consultants and contractors seeking inclusion in three pre-qualified lists under a new council that will soon be offering full-cycle building repairs. The non-statutory Building Maintenance Support and Services Council – to be established by year-end – will gradually take over the Urban Renewal Authority's building-upkeep subsidy schemes under its Smart Tender system. Taking to the airwaves on Saturday, Secretary for Development Bernadette Linn said the government had received about 150 applications from inspection and supervision consultants as well as 350 applications from contractors. "Why do I say it's encouraging? Because the URA's Smart Tender platform also had a pre-qualified list – now it has been taken down as we have this new one," she said. "The number of applications this time, compared to the one that was taken down, saw an increase of two to three times. "This means that there are more consultants and contractors who did not participate in the past. I took it as a vote of confidence in the future system." While the council will prioritise around 1,800 maintenance projects that are already in the Smart Tender system, Linn said it would first focus on the 600 or

so projects that had yet to undergo building inspections. “As inspections have not been carriedout on these buildings, we can – when the new service is rolled out – deploy an inspectionconsultant for them,” she said. Most of the remaining buildings, she pointed out, have alreadyrecruited supervision consultants. Initially, the government had been planning to put the URAor its subsidiaries in charge of the new support service. However, Linn said, following throughon that plan would have significantly increased the URA's burden as it was already handlingmany building maintenance-related works as well as redevelopment projects. As for the newPublic Housing Building Control Section that will replace the Housing Bureau’s IndependentChecking Unit within a month, Deputy Financial Secretary Michael Wong said he was confidentthat it would bring about more fundamental changes. About 300 staff from the unit, which hasbeen found by an independent inquiry to be primarily responsible for failed supervision ofmajor renovations at Wang Fuk Court in the runup to the fire, will move to the new section. “We have held more than 10 training classes [for staff] so as to raise vigilance andawareness,” said Wong, who is also acting secretary for housing. A dedicated team will overseeeach major maintenance project, while a project liaison officer will handle all enquiries fromowners’ corporations, he added. Edited by Azam Khan

- HK may see strongest growth in five years: Paul Chan (2026-10-31 06:54)

Hong Kong could record its strongest full-year economic growth figure in five years in 2026, according to Financial Secretary Paul Chan. Speaking on a radio programme on Saturday, he said the economy grew by 5.1 percent in the first half of the year and that strong export performance and investment growth continued into the third quarter. "What I'm most pleased to see is that in terms of investment, the growth momentum in the first half of the year carried through into the third quarter," Chan said. "Visitor numbers to Hong Kong are high, the streets are busy, and we're holding many mega events – such as the Wine and Dine Festival – plus many other big events and concerts. "We have FinTech Week coming up. There's a chance that 2026 will be the strongest full-year economic growth in the past five years." On next year’s budget, Chan said any relief measures would depend on economic performance. He said the government would do its best but substantial infrastructure spending ahead meant authorities would need to manage public finances closely. He also flagged external risks. If geopolitical tensions and the Middle East conflict persist, oil prices could rise and feed into inflationary pressures, Chan stressed. He expects interest rates to stay relatively high next year, which could affect the property market and the wider economy, and said the authorities would remain alert to financial risks. Edited by Azam Khan

- Buildings-repair body 'to operate on user-pays basis' (2026-10-31 04:21)

The new Building Maintenance Support and Services Council will operate on a non-profit basis but must recover costs on a user-pays basis, Financial Secretary Paul Chan said on Saturday, as the government moves to set it up in response to the independent committee report on the Wang Fuk Court fire. The council will guide owners through the full cycle of building repairs – handling tendering and evaluation on their behalf – for a fee. Chan told a Commercial Radio

programme that the non-statutory company, wholly owned by Financial Secretary Incorporated,must recover costs, as owners are responsible for maintaining private residential properties. Hesaid the fees would depend on the scope of the works and would cost roughly several thousanddollars per flat. "We understand that Hong Kong has many old districts, and some buildings arequite old," Chan said. "Many elderly people live there, and they may not be able to fully affordthe fees. So in these areas, the government can provide some subsidies." For better-off owners,professional guidance matters more than cash subsidies, so a one-size-fits-all subsidy ratiowould not be appropriate, Chan pointed out. He said a pre-screened list of professionals andcontractors would be published for owners to choose from, describing it asgovernment-checked to give owners greater peace of mind. The government has earmarkedHK$300 million for the plan, including HK$100 million as start-up capital and HK$200 million tosubsidise owners. The new body is expected to start operating by the end of the year, withrecruitment for a chief executive already underway. Edited by Robert Kemp

- HKEAA reports international exam data leak (2026-10-31 02:17)

The Hong Kong Examinations and Assessment Authority said on Friday that the personal data of 16,900 mainland residents applying for two international exams had been leaked. The data included names, dates of birth, and email addresses. The authority said it had discovered the incident on Thursday and reported it to the police and to the Office of the Privacy Commissioner for Personal Data. It said there was so far no evidence that DSE or other exams had been affected. The authority apologised and said it would take all feasible measures to mitigate the incident's impact. It said relevant examination organisers had been notified, and it was following up on arrangements to notify those affected. Edited by Robert Kemp
